IRRIGATION DEPARTMENT.

The 31st July 1906.

No. 6.—Notification.—It is hereby notified for general information that the Hon'ble the Lieutenant-Governor of Bengal is pleased, under the provisions of Sections XI and XII of Act V (B.C.) of 1864, to pass the following Rules in supersession of those now in force on the Nadia Rivers.

A draft of these rules has been published in the *Calcutta Gazette* of the dates noted in the margin as Notification No. 22, dated the 4th September 1905, as required by the terms of section XII of the Act.

The 6th, 13th, 20th, and 27th September, and 4th and 11th October 1905.

W. A. INGLIS,
Secy. to the Govt. of Bengal.

THE rules shall apply to the undermentioned navigable channels, which are included under the designation "Nadia Rivers," viz.:—

(1) the river Bhagirathi, throughout its whole course from the Ganges to Nadia, or to its junction with the Hooghly;
(2) the river Hooghly, from Nadia to its junction with the river Mathabhanga;
(3) the river Jalangi, from the Ganges to Nadia;
(4) the river Bhairab, from the Ganges to Nadia;
(5) the river Mathabhanga, from the Ganges to its junction with the Hooghly;
(6) such portions of the river Ganges as may be within five miles of the entrance for the time being of the Bhagirathi, the Bhairab, the Jalangi and the Mathabhanga rivers, respectively.

1. Every vessel entering, or making use of, the Nadia Rivers shall be liable to measurement for the purpose of ascertaining the tolls payable. In case of any reasonable doubt, the persons appointed by the Lieutenant-Governor to collect tolls and officers to whom such persons are subordinate shall have authority to again measure a vessel, notwithstanding that it was measured before.

2. Vessels for the purposes of the determination of tonnage shall be divided into two classes, as follows:—

Class I.—To include all vessels of the usual native types of build.

Class II.—To include all steamers, flats, barges and other square-built boats.

The tonnage of every vessel, whether laden or empty, shall, for the purposes of Act V of 1864 and of these rules, be determined by the following measurements:—

Class I.—

(*a*) The product of one quarter the length of the vessel from stem to stern, measured outside and along the water-line, multiplied by the greatest interior breadth of the vessel, multiplied by the interior depth from the water-line to the bottom of the vessel, is to be taken as the number of maunds on which toll shall be levied.

(*b*) The measurement of the length is to be made in feet, rejecting inches. The measurements of the breadth and depth are to be made in feet and quarters of a foot, rejecting any remainder of less than a quarter of a foot.

(*c*) The maundage on which the amount of toll is calculated shall be reckoned to the nearest integral multiple of 25 maunds, rejecting any remainder of less than 25 maunds. In the case of vessels exceeding 1,000 maunds by measurement, the maundage shall be reckoned to the nearest integral multiple of 100 maunds, rejecting any remainder of less than 100 maunds.

Class II.—

(*d*) For vessels of Class II the number of maunds obtained by the system of measurement prescribed for Class I shall be increased by one-half. For vessels of this class exceeding 5,000 maunds by measurement, the maundage shall be reckoned to the nearest integral multiple of 500 maunds, rejecting any remainder of less than 500 maunds.

(*e*) In the case of steamers that have been surveyed under Act VI of 1884, the registered tonnage entered in the certificate shall be accepted as the tonnage of the steamer in lieu of measurement.

The gross tonnage of steamers as determined by measurement shall be reduced by one-third as an allowance for engine-space.

(*f*) For vessels of Class II which are furnished with reliable way-bills or manifests, the gross maundage of cargo shown by the manifest may, at the option of the employer of the vessel, be taken as the maundage on which toll shall be charged: provided that the amount of tollage shall in no case be less than the amount which would be payable in respect of the tonnage of the vessel when empty. In the case of steamers that have been surveyed under Act VI of 1884, tolls shall be charged on the cargo, as thus determined, in addition

to the tolls chargeable on the registered tonnage of the steamer itself: provided that firms or individuals who wish to make use of this rule must be approved by the Superintending Engineer of the South-Western Circle, and that such approval may be withdrawn for any just cause.

3. Measurements shall be made daily, as soon as possible, after a vessel arrives at the toll station. From the 1st April to the 30th September, measurements shall be made between the hours of 6 A.M. and 5 P.M., and tickets under Rule 5 shall be delivered between the hours of 7 A.M. and 6 P.M. From the 1st October to the 31st March, measurements shall be made between the hours of 7 A.M. and 4 P.M. and tickets under Rule 5 shall be delivered between the hours of 8 A.M. and 5 P.M.

4. Every cargo vessel, immediately after entering the toll station limits, shall proceed to the measuring ghât or to such other place as the Toll Collector may direct, and shall remain there until it has been measured in accordance with these rules. After measurement the vessel shall be removed from the measuring ghât without delay. In any case the person in charge of a vessel shall place it in such situation as he may be required to by the Toll Collector.

5. After measurement the measuring muharrir shall deliver to the person in charge of the vessel a pass in the form appended (Appendix E I) and shall inform such person verbally of the amount of toll payable by him. The person in charge of the vessel shall then take the pass to the Toll Collector's Office, and shall there pay the toll demanded. The Toll Collector shall then deliver to him a ticket in the form appended (Appendix E II), which shall bear the stamp of the Toll Collector's Office, and the signature of the Toll Collector, or in his absence, that of the Toll Daroga. The vessel shall then be entitled to proceed without further charge.

6. The person in charge of a vessel conveying passengers, or laden with horses, cattle, fowls, or other live-stock, or with fruit, fish, or other articles which are liable to be injured by detention, shall not be required to attend at the toll office, but shall pay toll to the measuring muharrir at the rate of four annas per oar, as provided in item I of the schedule of tolls hereto annexed; and the muharrir shall deliver to such person a ticket in the form appended (Appendix E III) which shall entitle the vessel to proceed without further charge.

7. (*a*) All tolls are payable on demand, and shall be paid as provided in Rules 5 and 6 before a vessel is allowed to proceed.

(*b*) Provided that vessels belonging to individuals or firms specially approved by the Superintending Engineer of the South-Western Circle, which approval may be withdrawn for any just cause, may be permitted to proceed without prepayment.

(*c*) The person in charge of a vessel approved as in clause (*b*) shall, on passing a toll station, stop and deliver at the station a form specifying such particulars regarding the vessel and its cargo as may be required by the Superintending Engineer, South-Western Circle.

8. The tickets mentioned in Rules 5 and 6 must be kept on board the vessel, and must be produced for inspection when demanded by any person authorised to collect tolls, or by any officer to whom such person is subordinate. If on demand the ticket is not produced, such person or officer shall assess the tollage as provided in Rule 2, and shall demand payment of toll; and unless and until toll is paid, or the original ticket or a duplicate is produced as evidence that toll has already been paid, the vessel shall be liable to seizure and detention under the provisions of Section IX of the Act.

9. If a vessel on which toll has been duly paid be unable, by reason of the shallowness of the water, or of any other natural obstacle, to pass along any one of the Nadia Rivers, she will be permitted to pass along any other of the rivers without extra charge, except as provided in Rule 13. If the vessel be unable to pass along any of the rivers, the Toll Collector shall refund the amount of toll which may have been paid on such vessel.

10. The payment of toll at one toll station shall entitle a vessel to travel once along the whole length of the river on which that toll station is situated, whether or no the cargo is changed during the journey, except as provided in Rule 13.

11. A vessel containing passengers, or used for fishing, shall pay toll only once in the same day: provided that no passenger vessel shall be allowed this privilege unless returning empty, or conveying the same passengers as on the first trip. The "day" to be reckoned from midnight to midnight.

12. A cargo vessel, laden or empty, which has paid toll at a toll station, shall not be required to again pay toll if returning to the same toll station on the same day reckoned as in Rule 11, except as provided in Rule 13.

13. A vessel which has been measured and which has paid toll accordingly shall, in case additional cargo is taken on board, be subject to re-measurement whether on the same or another day, reckoned as in Rule 11, and to the payment of the amount by which the total toll leviable on the re-measurement exceeds that originally paid.

14. Passenger boats having on board cargo other than what is necessary for the use of the passengers for the trip and which measure 25 maunds and upwards shall be dealt with as cargo boats.

15. (*a*) Boats having on board only articles which are necessary for the use of the crew for the trip shall be dealt with as empty.

(*b*) Empty jars, tins, casks, bags, or other receptacles used, or to be used only for the purpose of holding cargo, shall not be considered as cargo.

16. No cargo shall be taken out of any boat, whether measured or unmeasured, within toll station limits without the permission of the Toll Collector.

17. Tickets and passes issued in respect of any vessel, boat, raft, or float are not transferable to any other vessel, boat, raft, or float.

18. (*a*) Duplicates of lost tickets, of which the numbers and dates can be satisfactorily established, will be granted by the Collector of Tolls.

(*b*) In case the person in charge of a boat desires to have a duplicate of the ticket mentioned in Rule 5, in order to make over to the owner of the boat or cargo, or for any other legitimate purpose not constituting an evasion or breach of these rules, the Toll Collector shall issue a duplicate at the time the request is made, whether at the time of issue of the original ticket or subsequently.

19. Any vessel, raft, float, or any number of vessels, rafts or floats fastened or connected together in any way, which, by reason of difficulty of proper control, or of excessive over-all length or breadth or depth, is of such a nature as, in the opinion of the Executive Engineer, Nadia Rivers Division, to be likely to cause unavoidable damage to the bandalling or other training or dredging works in the rivers, or to be likely to cause unavoidable obstruction to the traffic by grounding or sinking, is prohibited from passing into or along any of the channels comprised in the Nadia Rivers.

20. A vessel which has been detained under these rules or under Section IX of the Act may not be removed from the Nadia Rivers without the order of the Toll Collector until the toll due has been paid. During such detention the manji, owner or agent, must make arrangements for the safety of the vessel and cargo.

21. All vessels, whether the property of Government or of private owners, which are used by officers or subordinates of Government travelling on duty, or which are being used exclusively for Government work, are exempt from toll.

22. The Supervisor may by written notice, to be posted at the Toll Offices, prohibit the dropping of anchors or the putting up of bamboos or luggees in any specified part of the channels comprising the Nadia Rivers or on the banks.

23. No person shall wilfully or negligently allow a vessel to sink in the channels comprising the Nadia Rivers without the permission of the Supervisor.

24. In every case of a sunken vessel, whether due to negligence or otherwise, the Supervisor and his subordinates shall offer every assistance in removing the same.

25. When a sunken vessel has been recovered, the Supervisor shall cause notices to be posted at the Toll Offices, or other prominent places, calling on those concerned to pay to the Toll Collector all toll which may be due, as well as the expenses incurred on the recovery of the vessel and cargo. Should the sum due be not paid within thirty days of the date of notice, the boat and its furniture, or so much of it as may be necessary for the recovery of the dues, will be sold, under the procedure prescribed in Section IX of the Act.

26. The purchaser of a vessel sold under the provisions of Section IX of the Act shall have the right to take it out of the channels comprising the Nadia Rivers on the day of purchase, or within such time as may be allowed by the Toll Collector, without payment of tolls.

27. When any laden vessel, which has sunk, has been recovered, or when any laden vessel has been seized under the provisions of the Act or of these rules, the Supervisor shall give immediate notice of the recovery or seizure to the owner of the cargo or his agent, requiring the removal of the cargo without delay.

28. If the Supervisor be unable to ascertain the name and place of business or the abode of the owner of the cargo of such vessel, the notice prescribed in Rule 27 shall be effected by a notice exhibited in his office, and by advertisement in at least two local newspapers.

29. All vessels, whether travelling or moored, in the channels comprising the Nadia Rivers, shall, between sunset and sunrise, carry a white light in a lantern on the fore-part of the vessel where it can be distinctly seen from all sides. All steam vessels in motion shall carry the lights prescribed by the Board of Trade Regulations. Barges or boats attached to a steam vessel, whether in motion or moored, shall carry the lights prescribed above.

30. For any contravention of Rules 4, 7(*c*), 16, 17, 19, 20, 22, 23, 27, 29, or of any notice issued thereunder, the person in charge of the vessel, or other person in fault, shall, on conviction before a Magistrate, be liable to a fine not exceeding Rs. 50 or Rs. 5 a day for any continuing infringement.

PART I

OF IMPORTATION OF PETROLEUM.

Port of importation.

1. The port of Calcutta is hereby declared to be the only port at which petroleum may be imported in quantities exceeding, in the case of dangerous petroleum, forty gallons, and in the case of petroleum other than dangerous petroleum, five hundred gallons.

Procedure at ports other than those of importation.

2. The master of every ship carrying petroleum shall, on entering a port other than the port of Calcutta with the intention of discharging dangerous petroleum, give information of the quantity and description of the petroleum which he wishes to discharge to the District Magistrate or other officers appointed in this behalf by the Government of Bengal.

Declaration by master of ship carrying petroleum or by the ship's agent.

3. The master of every ship carrying petroleum shall deliver to the pilot before entering the port of Calcutta a written declaration under his signature stating—

(*a*) what quantity of petroleum the ship is carrying ;
(*b*) whether any and, if so, what part of it is dangerous petroleum ;
(*c*) whether any and, if so, what part of it is certificated petroleum ; and
(*d*) whether any and, if so, what part of it is oil intended exclusively for lubricating or jute-batching purposes and having a flashing-point above 150° of Fahrenheit's thermometer :

Provided that, if in anticipation of a ship's arrival, the agent for such ship delivers to the Port Officer a written declaration as foresaid under his signature, no such declaration shall be necessary by the master of the ship.

Delivery of certificate.

4. If the master or agent declares that any petroleum is certificated petroleum, he shall deliver to the pilot or Port Officer as the case may be, along with his declaration, the certificate relating to such petroleum.

Certificate and declaration to be forwarded to Chief Customs officer.

5. Every certificate and declaration delivered to a pilot under rules 3 and 4 shall be made over by him without delay to the Port Officer, and all certificates and declarations received by the Port Officer shall, with all convenient despatch, be forwarded by him to the Collector of Customs.

Delivery of samples.

6. (*1*) When the master of, or the agent for, a ship has made the declaration required by rule 3, the Collector of Customs shall direct an officer to go on board the vessel and obtain samples of all the petroleum on board, other than of petroleum which has been tested at any port in British India.

(*2*) The master shall deliver to the officer aforesaid, without charge, samples of every variety of petroleum comprised in the petroleum of which samples are to be taken under clause (1). Such samples shall, if such officer so require, be taken from the particular receptacles indicated by him and under his personal superintendence, and shall not exceed forty fluid ounces.

Selection of samples.

7. The minimum number of samples to be selected of each brand or quality contained in the cargo shall be as follows :—

(*a*) of certificated petroleum in cases—
one sample for every fifteen thousand cases or fraction of fifteen thousand cases ;
(*b*) of certificated petroleum in bulk or in tanks or in hogsheads, casks or drums declared to be of uniform quality—
one sample for every one hundred and twenty thousand gallons or part of one hundred and twenty thousand gallons ;
(*c*) of petroleum other than certificated, in cases—
one sample for every ten thousand cases or fraction of ten thousand cases ;
(*d*) of petroleum other than certificated, in bulk or in tanks or in hogsheads casks or dums declared to be of unform quality—
one sampale for every eighty thousand gallons or part of eighty thousand gallons.

Sealing of samples and forwarding the same to testing officer.

8 When the samples required have been delivered to the officer aforesaid, such officer shall forthwith seal the bottles containing the samples, and shall label them with the name of the ship, the name of the consignee, and such other distinguishing marks as may be necessary. He shall then forward them to the testing officer.

Methods of tests.

9. The testing officer shall test the samples thus received in the manner laid down in the Schedule to the Act.

Averaging results of tests.

10. If more than one sample of any one brand or quality forming the cargo or a portion of the cargo of a ship is sent to the testing officer for report, that officer shall test each sample separately and strike an average of the results. If the average flashing-point is not lower than 73° of Fahrenheit's thermometer and no one test gives a flashing-point below 70° of that thermometer, he shall report the whole of the petroleum represented by the samples to the Collector of Customs as non-dangerous.

Procedure when tests show want of uniformity.

11. If the testing officer, after testing samples, considers further tests necessary to satisfy him that none of the petroleum is dangerous, he shall report to the Collector of Customs accordingly.

Procedure on report.

12. On receipt of a report under rule 11—

(*a*) when the consignment is imported in cases, the Collector of Customs shall cause the petroleum in question to be landed and stacked in lots of one thousand cases each, or to be discharged into boats, each containing five hundred cases; and the officer referred to in rule 6 shall select and deliver to the testing officer one sample from each lot;

(*b*) when the consignment is imported in bulk, the Collector of Customs after the contents of the tank from which the original sample was taken have been duly stirred, shall forward a second sample and, until receipt of the testing officer's further report, shall prevent the landing of any portion of the contents of the tank in question.

(*c*) if the petroleum has been already landed and stored under rule 19, it shall be divided into lots, and samples of each lot shall be selected as aforesaid.

Report of testing officer.

13. The testing officer shall, as soon as practicable, and ordinarily within twenty-four hours after receipt of any samples, sign a report certifying that they are, or are not, dangerous petroleum, as the case may be, and shall forward such report to the office of the Collector of Customs where it shall be deposited.

Exemption of petroleum already tested in British India from further test.

14. Certificated petroleum imported from a port in British India shall not be re-tested on arrival at the port of Calcutta.

Fee for testing.

15. The fee for testing each sample shall be five rupees.

When a ship carrying petroleum may anchor at ordinary anchorage.

16. A ship may proceed to the usual anchorage in the port of Calcutta and there discharge any certificated petroleum not exceeding five thousand gallons in quantity:

Provided that the officer whose duty it is, under rule 6, to select samples of petroleum on board, may at any time take a sample of any such petroleum or oil for the purpose of having it tested, except as provided for in rule 14.

When a ship carrying petroleum must anchor at a special anchorage.

17. Save as provided in rules 16 and 25, every ship having petroleum on board shall be anchored at such anchorage as the Conservator of the port shall appoint in this behalf, and shall not leave such anchorage until such petroleum has been discharged.

Petroleum referred to in rule 17 not to be landed until it has been tested.

18. Save as provided in rule 19, no petroleum shall be landed from any ship referred to in rule 17 until the testing officer's report in respect thereof has been received in the office of the Collector of Customs.

Exception in respect of certificated petroleum exceeding five thousand gallons.

19. (*1*) The Collector of Customs may, in anticipation of the testing officer's report, allow the consignee of any certificated petroleum exceeding five thousand gallons in quantity to discharge the same into boats or to land it.

(*2*) Such permission shall be subject to the condition that the boats into which the petroleum is discharged shall remain at such place as may be directed by the Collector of Customs, or that the petroleum shall be landed at a landing-place duly appointed for this purpose by the aforesaid officer, and be stored in a public warehouse built according to any rules in force for the storage of petroleum and set apart for the storage of certificated petroleum which has not been reported non-dangerous, or within such limits as may be approved for the purpose by the Collector of Customs.

Landing of petroleum in bulk.

20. When petroleum is imported in bulk, its removal from the ship shall be effected by means of a hose and a cast-iron pipe, and it shall be pumped into storage-tanks. The discharge shall be continuous, day and night, until completed, weather and appliances permitting. When working at night, electric light only shall be used; and, when the ship has finished discharging, the pipe to the storage-tanks shall immediately be emptied by means of a supplementary pump on shore. If for any cause the discharge of petroleum is at any time suspended, arrangements must be made by means of a valve for effectually preventing any of the oil left in the pipe from escaping.

Landing of petroleum otherwise than in bulk.

21. When petroleum imported otherwise than in bulk is landed within the port—

(1) it shall be landed only in cargo-boats, and after sunrise and before sunset, and only at such place or places as the Conservator of the port shall direct;

(2) no smoking, fire or light of any description shall be allowed in any cargo-boat during the time that the petroleum is on board the boat.

Transhipment of petroleum.

22. Certificated petroleum, or petroleum which has been certified under these rules not to be dangerous, may be transhipped for any other port, whether within or beyond the limits of British India: provided that—

(*a*) the petroleum shall not be transhipped between sunset and sunrise, and that

(*b*) no smoking, fire or light of any description shall be allowed on any boat which is being used for the transhipment.

Import-licenses how obtainable.

23. (*1*) Applications for import-licenses under section 5 of the Act shall be in Form N, and shall be submitted to the officer appointed by the Government of Bengal in this behalf, who will, after enquiry, forward the same with his opinion to the Government of Bengal.

(*2*) If the application is granted, a license in Form O, signed by a Secretary to Government, shall be forwarded to the applicant through the officer to whom his application was submitted.

Petroleum comprised in ship's stores.

24. Nothing in the foregoing rules in this Part applies to petroleum, other than dangerous petroleum, comprised in a ship's stores and manifested as such, provided it is not of unreasonably large amount. If any question arises as to whether any petroleum manifested as ship's stores is of an unreasonably large amount, the decision thereon of the Collector of Customs shall be final.

Petroleum used for lubricating and batching purposes.

25. Nothing in the foregoing rules in this Part applies to petroleum which is ordinarily used for lubricating of jutebatching purposes, and which has a flashing point above 150° of Fahrenheit's thermometer. If the master of, or agent for, a ship certifies in writing that any petroleum on board is of this description, the Collector of Customs shall allow it to be discharged in the same manner as ordinary cargo; but the Commissioner of Police or District Magistrate, as the case may be, may at any time require a sample of any portion of it to be delivered to him, with a view to having it tested.

ANNUAL REPORT ON THE GOVERNMENT CINCHONA PLANTATION AND FACTORY IN BENGAL FOR THE YEAR 1905-06.

NOTIFICATION.

No. 1781Medl.—The 30th July 1906.—The following extracts from the Annual Report on the Government Cinchona Plantation and Factory in Bengal for the year 1905-1906 are published for general information.

H. J. McINTOSH,
Offg. Secretary to the Govt. of Bengal.

Forty-fourth Annual Report of the Government Cinchona Plantation, British Sikkim, being that for the financial year 1905-06, and also the Report of the Factory of the same year, by Captain A. T. Gage, I.M.S., Acting Superintendent of Cinchona Cultivation in Bengal and Acting Government Quinologist.

1. *Weather and General.*—At Mungpoo the total rainfall amounted to 138·05 inches. At Munsong, east of the Teesta, 104·39 inches were registered. The amount of rainfall at both places was considerably above the average, but was fairly evenly distributed.

2. *Plantation and Crop.*—During the year 103·97 acres of extensions were planted up with Cinchona Ledgeriana, 51·29 acres being at Mungpoo and 52·68 acres at Munsong. The total number of young trees planted out on those two extensions is 283,032. The balance of the nursery stock of Ledger was employed in filling up vacancies in the Labdah division, and the stock of Hybrid was similarly used to fill up vacancies on the Sittong division. The Ledger trees put out were all from seed of trees which by analysis had been found to possess good quinine contents. Bone-meal and leaf soil have been used as a manurial application on part of the Mungpoo plantation. The old stock of Hybrid No. 2 (Ledger x Succirubra) has been replaced by a smaller stock of plants which were selected by Mr. Pantling—after a series of analyses made by himself—for their richness in quinine contents. The nursery stock of seedlings stood at 92 on 31st March 1906. The number of trees in the permanent plantations on 31st March 1906 was 3,609,213, distributed as follows:—Mungpoo 2,147,767, Sittong 254,397, Munsong 1,207,049. Of these Cinchona Ledgeriana claimed 2,904,659, of which number about two fifths are on Munsong, an interesting indication of the growing importance of the trans-Teesta division of the Plantation. The details of the distribution of the trees are given in Appendix A (1) and A (2). The increase in the total number of trees on the Plantation since 31st March 1905 is 35,499. The total amount of bark harvested from the Plantation was 373,813 lbs., an increase of 62,535 lbs. over last year's harvest. Of the total amount 312,612 lbs. were Ledger bark, 56,179 lbs. Hybrid No. 1 bark, and the remainder Succirubra. Mungpoo plantation supplied about four-fifths of the total amount and Munsong the remainder. Towards the end of the year bark drying sheds and bark store godowns were in course of erection at Munsong.

3. *Factory and Outturn.*—During the year 546,919¼ lbs. of mixed bark were worked up in the factory. Of this quantity 419,072½ lbs. were Cinchona Ledgeriana and 111,810½ lbs. were Hybrid No. 1, both harvested off the plantation during the year under review and preceding years. The remainder 16,036¼ lbs. was Cinchona officinalis purchased during 1904 05. The amount of Sulphate of Quinine manufactured was 15,777 lbs. 12 ozs., showing an increase of 2,709 lbs. over the outturn of 1904-05. Cinchona Febrifuge amounted to 5,462 lbs. being 3,436 lbs. more than last year's amount. The manufacture of Sulphate of Cinchonidine was suspended during the year so that only 375 lbs. were turned out. The total outturn of the Factory for the year is 21,614 lbs. 12 oz., an increase of 5,975 lbs. over that of the preceding year. The average yield of Sulphate of Quinine in the Factory was 2·88 per cent.

During the year the work of extending the Factory in order that it may turn out in the future a minimum of 20,000 lbs. of Sulphate of Quinine annually has proceeded as well as circumstances have allowed. It was expected that the Factory extensions would have been completed or well advanced by the end of the year; but the vexatious delay in receiving the machinery from England, — the most essential parts of which like the boiler and turbine pipes had not even arrived in India at the end of the year—has rendered it impossible to do more than erect the necessary buildings, and prepare them for the machinery when it does come. As it is, a new grinding house and a new house for the manufacture of Cinchona Febrifuge and purification of Quinine Sulphate have been erected, and revetment walls built to support the earth above and below them. A site has been built up for the boiler and a large masonry water-tank, 70 feet by 67 feet, has been completed, to supply water to drive the turbines of the grinding house and factory. A room in the Factory has been fitted up as a laboratory, where the work of the Factory will be systematically controlled and bark analyses performed. Mr. Shaw, the recently appointed Assistant-Quinologist, by modifying some of the details of Quinine extraction, has been able to replace half of the expensive Caustic Soda by Lime, which should lessen the cost of manufacture and decrease the difficulties of purification.

4. *General Charges.*—The charges against the Department amount to Rs. 72,819-6-2 as against Rs. 16,741-10-3 in 1904-05. The total is made up of Rs. 3,870 for clerical and menial staff; Rs 714-11 for postal and telegraph

charges; Rs. 892 for advertisements; Rs. 2,212-8 for taxes; Rs. 5,269-4 for extensions of the Plantation; Rs. 5,250-7 for erection of Bark godowns, etc.; Rs. 54,610-8-2 for extension of the Factory.

5. *Plantation Charges.*—These amount to Rs. 84,870-1 as against Rs. 78,572-3-6 last year. Against this has to be placed 373,813 lbs. of bark collected during the year, and valued at Rs. 75,519-0-3.

6. *Factory Charges.*—The working expenses of the Factory were Rs. 69,274-11, being Rs. 55,237-9 incurred in the manufacture of Sulphate of Quinine; Rs. 12,630-14 in making Cinchona Febrifuge, and Rs. 1,406-4 in making Cinchonidine Sulphate. In addition Rs. 12,375 were paid for Quinine Sulphate bought from the Madras factory, Rs. 1,518-12-6 on account of bark purchased the previous year, and Rs. 443-9 for its carriage. The total factory expenditure is Rs. 83,612-0 6.

To produce the Factory outturn for the year the following quantities of bark were used :—

Ledger 419,072 lbs. 8 oz., valued at Rs. 89,489-7.
No. 1 Hybrid 111,810 lbs. 8 oz., valued at Rs. 15,723-5-7.
Officinalis 16,036 lbs. 4 oz., valued at Rs. 3,006-12-9.
In all 546,919 lbs. 4 oz. of mixed bark, valued at Rs. 1,08,219-9-4.

7 *Issues of Manufactured Articles.*—The amount of Sulphate of Quinine sold from the Botanic Garden was 16,753 lbs. 7 oz., including 1,000 lbs. which had to be purchased from Madras when several heavy and urgent indents could not be overtaken at once by the Bengal Factory. The amount sold is 1,887 lbs. 14 oz. in excess of last year's figures. The Medical Depôts, the Superintendent of the Central Prison, Lahore, and the Inspector-General of Prisons, Bengal, took respectively 2,200 lbs., 240 lbs., and 30 lbs. 8 oz. more than they did last year. On the other hand the Alipore Jail for pice-packets took 400 lbs. less, and Government officers, Dispensaries, and Medical Mission 183 lbs. ½ oz. less than last year's amount. Of Cinchona Febrifuge 3,099 lbs. 12 oz. were sold, being 318 lbs. less than last year's sale. The decrease is shown in the amount purchased by the public as well as in that supplied to Medical Depôts and the Inspector-General of Prisons. The sale of Sulphate of Cinchonidine amounted to 137 lbs. 4 oz., which, although 86 lbs. more than was sold last year, is still an insignificant quantity. A detailed statement of the sales of Sulphate of Quinine, Sulphate of Cinchonidine and Cinchona Febrifuge to dispensaries in the various Provinces is given in Appendix G.

8. *Receipts.*—The total receipts for the year amount to Rs. 2,37,538-4. Although this shows an increase of Rs. 8,810-7-4 over last year's receipts, it is short of the year's total expenditure on the Department by Rs. 3,763-3-8. This is explained by the heavy non-recurrent expenditure of nearly Rs. 60,000 in connection with the Factory extension. On the other hand, owing to labour difficulties at Munsong and other causes already referred to in connection with Factory extension, the whole of the budget allotment for 1905-06 could not be spent, and there is a saving of Rs. 11,746-8-4 on the year's allotment. Of the Receipts Rs. 78,283-8 were cash, and included Rs. 54,840-8 for Sulphate of Quinine, Rs 20,811-12 for Cinchona Febrifuge, Rs. 1,380 for residual alkaloids, Rs. 867 for Cinchonidine Sulphate, Rs. 263-4 for Cinchona bark, and Rs. 121 for Miscellaneous articles. The book credits amount to Rs. 1,59,254-12 made up of Rs. 46,729 for Sulphate of Quinine issued to the Jail Department for making into pice-packets; Rs. 1,08,974-8 for Sulphate of Quinine, and Rs. 2,655 for Cinchona Febrifuge, both issued to Medical Depots and the Inspector-General of Prisons, Bengal; Rs. 840 for Cinchonidine Sulphate and Rs. 56-4 for Cinchona bark, both issued to Medical Depots. The details are given in Appendix B. The outstandings of Rs. 573 on 31st March 1905 were all recovered.

9. *Stock account.*—On the 31st March 1906 there were in stock Sulphate of Quinine, 3,455 lbs. 6½ oz., valued at Rs. 40,169-1-9; Sulphate of Cinchonidine 1,021 lbs. 8 oz., valued at Rs. 16,344; Cinchona Febrifuge 3,030 lbs. 8oz., valued at Rs. 22,728-12; residual alkaloids 5,145 lbs., valued at Rs. 4,501-14; Cinchona bark of all sorts, 1,080,004 lbs., valued at Rs. 2,13,546-8-7; oil 7,510 gallons valued at Rs. 3,913-4-3; Chemicals 151,986 lbs, valued at Rs. 11,665-14; sundry stores valued at Rs. 990-0-9. The values are calculated on the

average rate at which similar stock was sold during the year. The total value of stock stands at Rs. 3,13,859-7-4. The 35 lbs. 12 oz., of Cinchona Febrifuge, shown as in defect on re-estimation of stock, was unpurified Febrifuge which has been in stock for a long time. As it is quite useless it has been deducted from stock this year.

10. *Profit and loss account.*—This is shown in Appendix E. The profit on the year's working is Rs. 57,930-3-6. This, however, is more than swallowed up by the non-recurrent expenditure of Rs. 59,860-15-2 on the extension of the Factory.

11. *Sale of quinine at Post Offices.*—The quantity of Sulphate of Quinine issued to Post Offices was 4,200 lbs., being 400 lbs. less than that supplied during 1904-05.

12. *Miscellaneous.* (*a*) *Land-rent.*—As usual, the rent collected from settlers within the Cinchona reserve was paid into the Darjeeling Treasury. It amounted to Rs. 3,506-15-9. No credit is taken for this amount in the Plantation accounts.

(*b*) *Roads.*—The new Teesta Valley Road now in course of construction runs through the foot of the plantation close to the Ryang river. When once this road is linked up to the factory by a cart-road, which has now become urgently necessary, the conveyance of bulky articles to and from the Plantation or Factory will be vastly facilitated.

(*c*) *Bungalows.*—During the year a new bungalow was erected by plantation labour for the Assistant Superintendent of the Plantation, from plans drawn up by the Public Works Department from the budget, of which the expenditure on the bungalow was met. A more commodious and better built bungalow than his present one is desirable for the Assistant Quinologist, who at present has to reside in an old bungalow formerly occupied by one of the Plantation assistants.

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph and from eye observations.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office

The hygrometric elements are obtained from Tables IIk, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground. The rainfall reported on any day is for 24 hours preceding 8 A.M. of that day.

o, overcast; d, drizzling rain; p, passing temporary showers; ●, continued rain; t, thunder; ≤ lightning.

Circular No. 8—29-3, dated Simla, the 29th May 1906.

From—J. WILSON, Esq., C.S.I., Secretary to the Government of India, Department of Revenue and Agriculture,
To—The Chief Secretary to the Government of Bengal.

I AM directed to inform you that the Governor-General in Council has had under consideration the question of rewarding private persons who may have rendered special assistance to the Police or to the criminal administration by making small grants of land or assignments of land revenue to them. He has come to the conclusion that rewards in such a form would have an excellent effect in encouraging private persons to aid the Police against desperate criminals and in difficult circumstances, and is therefore pleased to promulgate the following rule on the subject.

A Local Government may, without the previous sanction of the Government of India, in recognition of special service rendered to the Police or to the criminal administration by a private person, inclusive of a village headman or watchman, make a gift to that person, or to his heir or widow, of State land of a value not exceeding Rs. 500, or may grant him or his heir or widow an assignment of land revenue not exceeding Rs. 15 a year for one life or for a term of twenty-five years, whichever period may be the longer. The grant may be made partly in the form of a gift of land and partly in the form of an assignment, either of the land revenue of that land or of other land; but the total estimated value of the grant should not exceed Rs. 500. The grant should be made on the condition that it will not be alienated without the sanction of the Collector and when it is in the form of an assignment of land revenue, it should be subject to the condition of loyalty and good conduct.

Procedure at ports other than those of importation.

2. The master of every ship carrying petroleum shall, on entering a port other than the port of Calcutta with the intention of discharging dangerous petroleum, give information of the quantity and description of the petroleum which he wishes to discharge to the District Magistrate or other officers appointed in this behalf by the Government of Bengal.

(*c*) whether any and, if so, what part of it is certificated petroleum ; and
(*d*) whether any and, if so, what part of it is oil intended exclusively for lubricating or jute-batching purposes and having a flashing-point above 150° of Fahrenheit's thermometer :

Provided that, if in anticipation of a ship's arrival, the agent for such ship delivers to the Port Officer a written declaration as foresaid under his signature, no such declaration shall be necessary by the master of the ship.

Delivery of certificate.

4. If the master or agent declares that any petroleum is certificated petroleum, he shall deliver to the pilot or Port Officer as the case may be, along with his declaration, the certificate relating to such petroleum.

Certificate and declaration to be forwarded to Chief Customs officer.

5. Every certificate and declaration delivered to a pilot under rules 3 and 4 shall be made over by him without delay to the Port Officer, and all certificates and declarations received by the Port Officer shall, with all convenient despatch, be forwarded by him to the Collector of Customs.

6. (*1*) When the master of, or the agent for, a ship has made the declaration required by rule 3, the Collector of Customs shall direct an officer to go on board the vessel and obtain samples of all the petroleum on board, other than of petroleum which has been tested at any port in British India.

(*2*) The master shall deliver to the officer aforesaid, without charge, samples of every variety of petroleum comprised in the petroleum of which samples are to be taken under clause (1). Such samples shall, if such officer so require, be taken from the particular receptacles indicated by him and under his personal superintendence, and shall not exceed forty fluid ounces.

10. If more than one sample of any one brand or quality forming the cargo or a portion of the cargo of a ship is sent to the testing officer for report, that officer shall test each sample separately and strike an average of the results. If the average flashing-point is not lower than 73° of Fahrenheit's thermometer and no one test gives a flashing-point below 70° of that thermometer, he shall report the whole of the petroleum represented by the samples to the Collector of Customs as non-dangerous.

Procedure when tests show want of uniformity.

11. If the testing officer, after testing samples, considers further tests necessary to satisfy him that none of the petroleum is dangerous, he shall report to the Collector of Customs accordingly.

Procedure on report.

12. On receipt of a report under rule 11—

When a ship carrying petroleum may anchor at ordinary anchorage.

16. A ship may proceed to the usual anchorage in the port of Calcutta and there discharge any certificated petroleum not exceeding five thousand gallons in quantity:

Provided that the officer whose duty it is, under rule 6, to select samples of petroleum on board, may at any time take a sample of any such petroleum or oil for the purpose of having it tested, except as provided for in rule 14.

When a ship carrying petroleum must anchor at a special anchorage.

17. Save as provided in rules 16 and 25, every ship having petroleum on board shall be anchored at such anchorage as the Conservator of the port shall appoint in this behalf, and shall not leave such anchorage until such petroleum has been discharged.

The discharge shall be continuous, day and night, until completed, weather and appliances permitting. When working at night, electric light only shall be used; and, when the ship has finished discharging, the pipe to the storage-tanks shall immediately be emptied by means of a supplementary pump on shore. If for any cause the discharge of petroleum is at any time suspended, arrangements must be made by means of a valve for effectually preventing any of the oil left in the pipe from escaping.

Landing of petroleum otherwise than in bulk.

21. When petroleum imported otherwise than in bulk is landed within the port—

(1) it shall be landed only in cargo-boats, and after sunrise and before sunset, and only at such place or places as the Conservator of the port shall direct;

Petroleum comprised in ship's stores.

25. Nothing in the foregoing rules in this Part applies to petroleum which is ordinarily used for lubricating of jutebatching purposes, and which has a flashing point above 150° of Fahrenheit's thermometer. If the master of, or agent for, a ship certifies in writing that any petroleum on board is of this description, the Collector of Customs shall allow it to be discharged in the same manner as ordinary cargo ; but the Commissioner of Police or District Magistrate, as the case may be, may at any time require a sample of any portion of it to be delivered to him, with a view to having it tested.

Law relating to Civil Courts in the Sambalpur district.

2. Notwithstanding anything contained in section 2 of the Bengal and Assam Laws Act, 1905, the Central Provinces Courts Act, 1904, is hereby repealed in the district of Sambalpur; and the Bengal, North-Western Provinces and Assam Civil Courts Act, 1887 (which may hereafter be cited for all purposes, but without prejudice to any other mode of citation as the Bengal, Agra and Assam Civil Courts Act, 1887), is hereby extended to that district. VII of 1905. II of 1904. XII of 1887.

Saving.

3 All Courts constituted, appointments, rules and orders made, jurisdictions and powers conferred and other things done in the said territory under the said Central Provinces Courts Act, 1904, or under any enactment repealed thereby, shall, so far as may be, be deemed to have been respectively constituted, made, conferred and done under the said Bengal, Agra and Assam Civil Courts Act, 1887. [*Cf.* Act XII of 1887, s. 2 (*3*).] II of 1904. XII of 1887.

Construction of references to Act II of 1904.

4. Any enactment or document referring to the said Central Provinces Courts Act, 1904, or to any enactment repealed thereby, shall, in respect of the said district, be construed to refer to the said Bengal, Agra and Assam Civil Courts Act, 1887, or the corresponding portion thereof. [*Cf.* Act XII of 1887, s. 2 (*3*).] II of 1904 XII of 1887.

Pending proceedings.

5. Nothing in this Act shall affect any proceeding which, at the commencement thereof, is pending in any Civil Court in the Sambalpur district, and every such proceeding shall be continued as if this Act had not been passed: [*Cf.* Reg. VII of 1901, s. 94.]

Provided that appeals from decrees and orders passed by Civil Courts and not appealed against before the commencement of this Act shall lie to the Court exercising the jurisdiction under the Bengal, Agra and Assam Civil Courts Act, 1887, which corresponds, as far as may be, to the jurisdiction of the Court to which such appeals would have lain if this Act had not been passed. XII of 1887.

Amendment of section 36 (*1*) (*a*) of Act XII of 1887.

6. In clause (*a*) of sub-section (*1*) of section 36 of the Bengal, Agra and Assam Civil Courts Act, 1887, after the words "Chutia Nagpur" the word "Sambalpur" shall be inserted. XII of 1887.

STATEMENT OF OBJECTS AND REASONS.

THE object of this Bill is to bring the law relating to the Civil Courts in the district of Sambalpur into conformity with that in force elsewhere in the territory included within the Bengal Division of the Presidency of Fort William. Under the provisions of the Bengal and Assam Laws Act, 1905, the Central Provinces Courts Act, 1904, remains in force in that district. It is obviously most inconvenient, for administrative reasons, that the Courts in one single district of all those under the jurisdiction of the High Court of Judicature at Fort William in Bengal, should be governed by a special law which applies nowhere else. Moreover, the present arrangement whereby the words "High Court of Judicature at Fort William in Bengal" are to be substituted for the words "Judicial Commissioner," wherever they occur in the Central Provinces Courts Act, is impracticable.

NOTES ON CLAUSES.

Clause 2 provides for the repeal in the Sambalpur district of the Central Provinces Courts Act, 1904, and for the extension thereto of the Bengal, Agra and Assam Civil Courts Act, 1887. Sub-section (*2*) of section 28 of the United Provinces General Clauses Act, 1904 (United Provinces Act I of 1904), has given reason for the proposed change in the title of the latter Act.

Clauses 3 and 4 are required because sections 6, 8 and 24 of the General Clauses Act, 1897 (X of 1897), are not applicable to a case of this kind.

Clause 5 is necessary in order to provide for pending proceedings. The most convenient rule is that pending cases should remain with the old authorities and not be transferred to the new ones. But appeals should be made to Courts constituted under the Bengal Act.

Clause 6 is intended to amend section 36 of the Bengal, Agra and Assam Civil Courts Act, 1887, in order to make up for the absence in that Act of any provision corresponding to section 23 (*1*) of the Central Provinces Courts Act, 1904. Such absence would militate against the operation of section 97 of the Central Provinces Tenancy Act, 1898, clause (*a*) of which makes suits between landlords and tenants as such triable exclusively by Judges who are also either Revenue-officers or Settlement-officers. It is not desirable that the said provision of the Central Provinces Act should be altered at present.

PROSPECTUS OF THE INDIAN INDUSTRIAL AND AGRICULTURAL EXHIBITION, 1906.

THE following is published for general information.

R. W. CARLYLE,
Chief Secy. to the Govt. of Bengal.

CALCUTTA,
The 2nd August 1906.

PROSPECTUS

THE INDIAN INDUSTRIAL AND AGRICULTURAL EXHIBITION, 1906.

IT is proposed to hold the annual Indian Industrial and Agricultural Exhibition this year at Calcutta early next December at the site of the Old Tramway Depôt and on the extensive grounds adjoining the General Hospital which have been acquired by the Bengal Government and kindly lent for the purpose of the Exhibition.

The Indian Industrial Exhibitions held annually since 1901 have served greatly to popularise and encourage the Indian arts and industries and their usefulness has been recognised by all sections of the press and the public.

The first of these exhibitions was organized and held in Calcutta in connection with the Indian National Congress in December 1901 and has since then been held at Ahmedabad in 1902, at Madras in 1903, at Bombay in 1904 and at Benares in 1905. The exhibition of 1906 will be similarly held in connection with the forthcoming Calcutta Session of the Congress.

The management and organization of the exhibition has been entrusted to a Committee representative of all sections of the community, the members of which need not in any way identify themselves with the politics of the Congress. The accounts of the exhibition and the Congress have been kept separate since the Madras exhibition of 1903, and this practice will be observed as regards the keeping of accounts of the forthcoming exhibition.

The organization of the exhibition is likely to prove costly, but large guarantees have been given by many leading men of Bengal.

The Government of Bengal, fully recognizing the industrial and educational value of such exhibitions, has very kindly offered to give special facilities for the exhibition of all such articles from its Agricultural, Art, Forest, Sanitary and other departments as may prove useful or instructive to the public and also to help in other ways the organization of the exhibition.

However, an undertaking of this nature can only succeed with the active co-operation of all sections of the community, and we hope that all will join hands to make the exhibition a success and worthy of this great city.

Although the scope of the exhibition is confined to articles of indigenous growth and manufacture, yet arrangements will be made for the exhibit of machinery and appliances of foreign manufacture which are likely to help and develop Indian industries.

An arcade (chowk bazar) will be a special feature of the exhibition where exhibitors will be allowed to keep a stock of their exhibits for ready sale.

A provisional Executive Committee of the gentlemen named below have been formed with powers to add to their number.

All communications to be addressed to the Honorary Secretary and all remittances to the Honorary Treasurer at the "Exhibition Office," 62 Bowbazar Street, Calcutta.

RULES AND REGULATIONS.

1. Articles of indigenous art or manufacture, as well as natural, mineral or agricultural products from any part of India, and adjacent British Possessions, will, as a rule, be accepted for the Exhibition. Implements or machines of foreign manufacture, which, in the opinion of the Exhibition authorities, are likely to promote or develop Indian industries, will also be accepted.

2. No explosives or any substance which, in the opinion of the Exhibition authorities, is noxious or dangerous, will be admitted.

3. Intending exhibitors should refer to the printed lists, attached herewith, of the sections and divisions into which it is intended to classify the exhibits. The classified list is meant only to serve for general guidance, and will not prevent exhibitors from sending articles not especially enumerated therein. Such articles will, however, be admitted at the discretion of the Exhibition authorities.

4. Works of art and articles of special merit, including those of antiquarian interest, will be thankfully received from gentlemen who do not aim at any commercial advantage or benefit. All arrangements for the display of the exhibits lent will be made by the Exhibition authorities at their own expense.

Gentlemen desirous of sending exhibits on loan should write to the effect, giving all the necessary particulars about their exhibits, to the Secretaries, who will inform them of the acceptance of their offer and make with them all the necessary arrangements in connection with the exhibition of the offered articles.

5. Applications for space in the Exhibition *Pandal* specifying the space that will be required should be made at once in the form annexed and should be accompanied by a fee of Rs. 5.

(It will be left to the option of the Exhibition authorities to reduce or remit the above-mentioned fee in such cases as they think fit.)

6. Intending exhibitors are requested to send in to the Secretaries, as soon as possible, a list of their proposed exhibits, in the printed form attached herewith. These lists should reach the Secretaries *at the latest by the* 1st of September.

7. Exhibitors are requested to mention in their application whether they intend to illustrate practically the process of their manufacture, and if so, to describe the nature of the demonstration. Steam or any other power required may be supplied by the Exhibition authorities, if there is sufficient demand, on such terms as may be agreed upon.

8. The Exhibition authorities will inform the applicants whether they are registered as exhibitors and will state the number allotted to them.

9. Each registered exhibitor will be allowed a covered space of 5 feet by 5 feet free of charge in each section, but additional covered space may be obtained, subject to a minimum charge of 8 annas per square foot.

10. Exhibitors may obtain, on such special terms as may be agreed upon, open space for the exhibition or practical demonstration of machinery, etc. They will be allowed to erect the necessary structures at their own expense, but according to plans approved of by the Exhibition authorities.

11. The Exhibition authorities will have absolute discretion as regards the acceptance or rejection of exhibits and the allotment of space, covered or uncovered.

12. Exhibits will be received from the 15th of October 1906 to the 1st of December 1906. They may be sent by railway or steamer as "parcel" or "goods" or through post, or may be delivered personally, or through agents between the hours of 10 A.M. and 4 P.M., at the above address or at the exhibition grounds and to authorised persons who will be in attendance there. Receipts will be granted for the articles so delivered. In case of goods forwarded by railway, steamer or post, the freight must be prepaid and the parcels preferably insured. Exhibits forwarded "unpaid" will be refused.

13. All packages received or delivered must bear a label on the upper covering specifying the name and number of the exhibitor, and addressed to the Honorary Secretary. They must contain inside a list in duplicate with all particulars required under Rule 19 in regard to the exhibits in the package. This list will be compared with the previous list submitted by the exhibitor along with his application and a formal receipt will be given to the exhibitor for the articles found in good condition.

14. Exhibitors failing to send their goods and appropriate the space allotted to them by the 1st of December 1906 shall forfeit all right to exhibit, and shall not receive any refund of the payments made by them. No refund also will be given for occupying less space than that applied and paid for and allotted; and the unoccupied space will be disposed of as the Exhibition authorities deem fit.

15. Every facility will be afforded to exhibitors or their agents in connection with the transport, display, sale and care of their exhibits.

16. Exhibitors must bear all expenses incidental to the transport and the delivery of their exhibits, as well as their removal after the Exhibition is closed. If the exhibitors require for the display of their exhibits in the *Pandal* and *special* arrangement or construction, stands, cases, tables, shelves, etc., or have to mount their machinery and apparatus, they must carry out all this themselves, and at their own cost, and in accordance with plans approved by the Exhibition authorities.

17. Such assistants, servants, or other attendants as an exhibitor may require for service at his stalls may be allowed to enter the Exhibition *Pandal*, on obtaining a pass from the Secretaries. All such attendants shall have to obey the orders of the Exhibition authorities and the supervising staff appointed by them.

18. All reasonable precaution will be taken to guard the premises of the Exhibition and secure the safety of the exhibits. The Exhibition authorities, however, do not at all hold themselves responsible for any damage or loss howsoever occurring. Exhibitors wishing to insure their articles may apply to the Secretaries, who will arrange for the same on payment of the necessary charges All valuable exhibits, such as jewelry, gold and silver plate, must be forwarded under the charge of an attendant.

19. Every exhibit must bear a label showing the name or description of the article, its price, the place and the date of its production or manufacture, the names of the manufacturer and the Exhibitor, and if purchased, the place and the date of its purchase.

20. In the exhibition stalls orders for articles may be registered, but no ready sale will be allowed. But to suit the convenience of the visitors and the exhibitors a portion of the Exhibition enclosure will be laid-out in the form of an arcade where the exhibitors under prescribed regulations will be allowed to stock their articles for purposes of ready sales.

21. Exhibitors who are unable to attend personally or send agents in charge of the exhibits may make special arrangements with the Secretaries for the exhibition of their goods, subject to the provisions of the foregoing rules, and on payment in advance of all estimated expenses, which may be ascertained on application.

22. The Exhibition authorities reserve the right to remove the exhibits of any person from the Exhibition grounds who does not conform to their rules and regulations.

23. No article exhibited may be copied, photographed, drawn, or reproduced in any manner, without the special permission of the exhibitor and the Exhibition authorities. General photographs of the stall may, however, be taken with the permission of the Exhibition authorities.

24. Arrangements with reference to machinery in motion will form the subject of special regulation.

25. A separate section will be allotted for the display of work done by ladies.

26. The Exhibition will be opened in the first week in December 1906 for the public and will continue for a month. An official catalogue of all exhibits with the names and addresses of the exhibitors and their agent or agents, if any, will be published by the Exhibition Committee, before the opening of the Exhibition. A Committee of specially qualified gentlemen will be appointed as Jurors, who will examine the exhibits, determine their relative merits and decide which of them deserve special recognition. The decision of the Jurors will be final. Gold, silver and bronze medals will be awarded according to their verdict. Certificates of merit will also be given. The names of the successful exhibitors will be published together with a description of the exhibits and the medals and certificates they have respectively obtained.

1905	623,000
1906	745,600

3. *Weather conditions.*—The rainfall in March was on the whole slightly in excess of the average. April, however, was exceptionally dry. This retarded sowings in most districts. The weather in May was not so unfavourable, though the rainfall was below normal. There was ample rain in June, and the conditions up to date this month have been seasonable. Fortunately for the crop drought did not occur generally after the sowings had taken place. The following figures show the rainfall in inches in April and May at the head-quarters of the four principal jute districts now left in this Province during the current and each of the preceding four years :—

	1902.	1903.	1904.	1905.	1906.
Purnea ...	8·19	2·32	8·30	9·08	3·54
Jessore ...	18·91	5·12	18·95	13·76	7·96
Murshidabad ..	10·82	4·90	11·70	11·71	2·98
24 Parganas ...	11·94	4·66	7·89	13·27	4·59

The greatest deficiency occurred in Murshidabad and Purnea; but good rain fell in these districts in June. Only four districts report the weather and rainfall as favourable or fairly favourable. In the remaining districts they were generally unfavourable, being late or insufficient for the sowings, thus retarding the crop in almost all parts. The sowings are reported to be not yet fully completed in four districts.

4. *District Returns.*—The total acreage sown, however, in the 14 districts shows an increase of about 135,000 acres or about 22 per cent. over the figures for the preceding year. Murshidabad shows the largest increase (57,700 acres). The Collector attributes this enormous increase to the higher prices paid for jute last year, and to the fact that the cultivation is being found more profitable than that of paddy, and is supplanting the latter. Jessore (+29,200 acres), Hooghly (+26,400 acres), Khulna (+26,300 acres) and Nadia (+21,700 acres) each show a large extension of cultivation; but the Khulna figures for 1905 were probably too low. Purnea is the only district that shows a large decrease in area, *viz.*, 31,800 acres. This was due to plants dying owing to the want of timely rain. In the final forecast for last year, 17,900 acres were shown as the approximate area sown in the Bhagalpur district. In the present forecast the Collector has reduced this to 5,000 acres, and has shown 4,700 acres as sown this year. Pending the receipt of details explaining the reduction in last year's area, I have let the Collector's figures stand.

5. *Condition and Prospects.*—In only one district, *viz.*, Darjeeling, where the area under cultivation is very small the condition of the crop is poor. In the remaining districts it is reported generally to be fair. On the whole the prospects at present may be said to be better than last year in eight districts, about the same in three, and worse in three (Burdwan, Howrah and Purnea). These last three districts contain an aggregate cultivation of 308,900 acres. If conditions continue to be favourable, the crop should on the whole be as good as last year; while the acreage has largely increased.

6. *General.*—In the annexed district returns I have omitted the column showing normal area. As Mr. Beatson Bell pointed out last year, the rapid expansion of jute cultivation makes any attempt to calculate a normal area misleading. Where Cadastral survey figures are available, they have been entered.

Owing to insufficient rainfall after the sowings, the growth of the crop has been somewhat unfavourable. The present condition of the crop is fair. The sowings have been completed though rather late. The crop of this year is expected to be less than the normal and the crop of last year. Although there has been no cultivation of jute in the Ranigunge subdivision this year, the estimated area under this crop is altogether larger this year, owing to a much larger area having been sown in the Kalna subdivision with this crop. The Sub-divisional Officer of Kalna reports this is due to the high price obtained by the cultivators last year which induced them to increase the cultivation.	
	Midnapore ..	3,319,040	2,190,600	10,600	9,460	Very little in Sadar, Contai, and Tamluk, and no jute in Ghatal.	35,342	1893 to 1896.	29	25th May	Weather and rainfall were favourable in Ghatal and unfavourable in other subdivisions. The condition of the crop is poor in Tamluk and fair in other subdivisions. Sowings were late and are still going on in Sadar and Tamluk. The crop is moderate in Sadar, better in Contai and Ghatal, and worse in Tamluk. The decrease in the area sown this year is due to want of early rain.

The present condition of the crop is fair. The sowings were a little late but have been completed. The outturn this year is expected to be less than that of last year. The increase in the area sown this year is due to the abnormal rise in the price of jute last year.

Condition of the crop is fair but in certain places in Ihana Gangni, Meherpur subdivision, the crop is damaged by insects. Sowings were a little late but they have been completed, except in Tehata Police-station, Meherpur subdivision, where it is still going on. The crop is expected to be better except in the Meherpur subdivision. The increase is, the area sown this year is due to high prices obtained last year.
	Murshidabad		1,571,520	985,500	40,800	96,000	Do.	...	...	About middle of May	The weather and rainfall, on the whole, pretty favourable so far. The condition of the crop is fair, up to now. The sowings were rather late in a large part of the area owing to late rains. They have nearly been completed. The crop is expected to be a normal one. A very large area is reported to have been cultivated with jute owing to the favourable state of the market last year. The crop is not so easily liable to wholesale damage by inundation as the kharif paddy and is also less costly in cultivation. It is at the same time much more profitable than paddy. In fact a large proportion of the area under paddy has been absorbed in the cultivation of jute.
	Jessore	...	1,672,000	1,191,000	41,300	70,500	Do.	...	...	The sowing was late this year for want of seasonable rain in early part of May.	The rainfall was insufficient at first but has been favourable of late. Weather was favourable on the whole. The condition of the crop is fair and promising. The sowings were late this year by more than a month owing to late rainfall. Sowing has been completed in this district. Prospects appear to be better than in the previous year. The large increase in the area sown under jute this year is reported to be due to extension of its cultivation, chiefly in the subdivisions of Bongaon and Jhenida owing to very good prices obtained last year and the crop being found more profitable than paddy.

The present condition of the crop is fair. The sowings have been completed although a little late. The crop is expected to be better in comparison with the normal. The increase in area sown is due to revision of estimate as well as to the fact that the cultivation of jute is steadily increasing. Owing to the highly profitable character of the business in jute, most of the *aus* paddy fields are being sown with it.

The crop is expected to be worse than last year, but it is a fairly normal crop. At first a larger area than last year was sown in March, but the plants dried up for want of rain. The fields were sown again, but a less area than before and a portion was given up as it could not be weeded. The rainfall was untimely and the growth of the crop was consequently retarded. The condition of the crop is poor generally. Sowings were a little late but have been completed. Generally the outturn will be below the normal.

The increase in the area sown is due to the high prices obtained for jute last year. Weather and rainfall have been reported as generally unfavourable for the growth of the crop. The present condition of the crop is fair. The sowings were a little late this year for want of rain. The sowings nearly completed. The crop of this year is at present said to be not better than the crop of last year. The cause of decrease in area is being ascertained. All the figures are taken from ordinary agency. My own opinion is that the area under jute as a result of the bumper crop of last year, must have increased at least one-third and that (with great hesitation I say this) the season has been much less unfavourable than reported.
	Balasore ...	1,334,360	932,200	4,200	5,300	Little ...	1,169,190	1891-92 to 1894-95	133	15th May to the end of the month.	The weather and rainfall were favourable. The condition of the crop is fair. The sowings were normal and completed. The crop is expected to be better than last year, but it is too early to say anything definitely yet. Jute is a paying crop and its cultivation is extending all over the district.

DEPARTMENT OF LAND RECORDS AND AGRICULTURE, EASTERN BENGAL AND ASSAM.

Preliminary Forecast of the Jute Crop, 1906.

[On an average of the five years ending 1903-04, the area under jute crop in the territory to which this forecast relates has represented some 85·8 per cent. of the total area under jute crop in British India.]

Area under jute.—The area under jute in Eastern Bengal and Assam is estimated to be 2,525,800 acres this year, as compared with 2,557,550 acres in 1905. The figures are based on estimates: they have been carefully collected and are the best available, but not resting on the basis of a survey, should be received with caution. The decrease in acreage, 31,750 acres, is mostly apparent and does not represent a falling off in the area actually under jute, being largely due to a revision of figures in the Noagaon subdivision of Rajshahi district (23,400 acres) and to a revision of figures in the south of Dacca district (12,300 acres). 'If these two items are ignored, the area under jute is much the same as in the previous year. But, although this may be the case, the variations in the figures of individual districts are interesting and remarkable.

2. *District returns.*—It is obvious to any one interested in the subject that the high prices obtained for jute last season would naturally result in a large extension of cultivation, unless the scarcity in Eastern Bengal and the high prices of rice, which in consequence have ruled all over the province, were sufficient to counteract the natural tendency and to cause the cultivators to place under early rice a portion of the land he might ordinarily be expected to reserve for jute. Particular enquiries were made into this point, and the notes of the District Officers on the subject are well worth perusal. It appears that in three districts certainly a large area normally under jute has been placed under early rice: they are Pabna (decrease 52,300 acres), Bogra (decrease 17,000 acres) and Faridpur (decrease 17,000 acres). On the other hand in Tippera (+61,000 acres) and Noakhali (+6,200 acres) the scarcity of rice has had no effect on the expansion of jute cultivation. Of the important districts, Mymensingh and Rangpur, it is probably correct to say that the circumstances of the year have acted as a check on what would have been otherwise a marked extension of jute. 'In Lower Assam there has been a decided increase in the area under jute. The figures for Kamrup are not published, as they fall below 2,000 acres. But enquiries lead me to believe that the figures reported fall far short of the facts, and a further investigation into this matter will be made.

3. *Character of the Season and Prospects.*— Rainfall was scanty in April, and at one time the prospects of the crop appeared to be threatened by drought. However, timely rain changed the aspect of affairs almost everywhere. Still it is true that in places early sowings suffered from and late sowings were retarded by want of rain. This was particularly the case in the Netrakona subdivision of Mymensingh and in Rangpur, Dinajpur, Rajshahi and Goalpara. Insect pests caused a certain amount of damage in Netrakona subdivision and Goalpara. But, in spite of this, prospects are without doubt generally favourable. Prospects of a bumper crop are reported from Tippera. In Noakhali, Faridpur, Rangpur, Dacca, Pabna and Bogra a good crop is expected: and in Mymensingh and Goalpara the undamaged portion of the crop—and this is probably by far the greater portion—is expected to turn out well.

4. *Consolidated forecast for the Lower Provinces of Bengal and Eastern Bengal and Assam.*—The Director of Agriculture, Bengal, estimates the acreage under jute in that Province to be 745,600 acres, as against 610,100 acres in 1905. The acreage figure for both Provinces is therefore 3,271,400 in 1906 as compared with 3,167,650 in 1905.

In one part of the district, *i.e.*, in Kurigram, there has been no increase or decrease of area under jute in consequence of the above facts, while in other parts the high price of jute led the cultivators at first to put more lands under jute, but later on as want of rain threatened the prospect of early jute, and the seedlings on many fields withered up, and as at the same time the rice market began to rise at an unusual

In fact, jute has taken the place of a good deal of the area usually under paddy on account of the high prices obtained by the cultivators last year. The sowings took place between the 1st and the 3rd week of March in Natore, rather early. In Sadar and Naogaon Subdivisions sowings were normal, between the 1st and the last week of April.	

Pabna ...	1,176,960	865 300	200,000	168,300	..	.	Nil	...	...	...	The small area under jute this year is due to the high price of rice which led the cultivators to grow early rice more extensively. The sowing of the crop began from 9th May in Sadar which was late and from 15th March in Serajgunge which was normal.
Bogra ..	869, 0	622,000	136,000	114,000	...	.	Very little	28,503	1893-94 and 1904-1905.	4,208	Sowing of jute began this year from 28th February, the normal date for the tract lying to the east of Karotoya river where jute grows extensively. Owing to the scarcity and high price of rice, aus (early rice) was substituted for jute in some lands. Hence the decrease in the area.
Mymensingh	4,655,480	2,405,000	795,200	801,000	...	...	Nil	...	...	..	High price of jute at first induced cultivators to sow more lands with jute this year. But at the beginning of the weeding season draught and insect pests having caused some damage to the crop some of the jute land was resown with paddy. The extent of damage was greatest in Netrakona Subdivision. The sowing of jute commenced from 15th March, the normal date.
Dacca ...	1,780,480	1,214,560	210,100	197,000	...	..	Little ..	...	...	...	The figures shown in the statement have been compiled from the reports of the Subdivisional Officers. As the district has not been cadastrally surveyed, they are of very little value Munshiganj and Manikganj show between them a decrease of 18,000 acres, whereas in Sadar and Narayanganj the area is practically the same as in the past year. It seems doubtful whether there has really been this large decrease in the southern part of the district. In spite of the scarcity of rice in all parts of the district I have visited, the jute has been cultivated with the greatest care, while the rice is left to struggle along as best as it can, half choked with weeds. Sowing is reported to have commenced this year in April, and rather late.
Faridpur ...	1,469,440	990,000	194,000	117,000	...	...	Very little	..	...	...	The area under jute has diminished this year owing to the high price of rice. About ¼ of the fields sown with jute last year has this year been sown with early paddy. The sowing commenced in the beginning of April, which was normal.

The mean pressure, temperature, &c., are deduced from eye observations.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground. The rainfall reported on any day is for 24 hours preceding 8 A.M. of that day.

Vessels, therefore, bound to Vladivostock should make cape Gamova. According to a Berlin Notice, the route thence to be followed is to pass westward of Rimskago Korsakofa, Stenin, and Tsivolko, with Popova and Kozakevicha close aboard, to the Eastern Bosporus.

As the cautionary Notices respecting fog-signals given in the Introductory notes in all copies of the Admiralty Lists of Lights do not appear to be quite understood, more especially the paragraphs pointing out that such signals are heard at greatly varying distances, and that there are occasionally areas around a fog-signal station in which the fog-signal is wholly inaudible, it is thought desirable to point out to seamen that not infrequently a fog-signal, which may be heard under favourable circumstances from a distance of 10 miles or upwards, is inaudible when only 2 or 3 miles off it, and that no surprise should be felt if, from a vessel, either at anchor, or underway, not far from a fog-signal station, the sound of the fog-signal is not heard on board.

No. 270, dated Calcutta, the $\frac{25}{26}$th June 1906.

From—Babu Ram Anugrah Narayan Singh, Chairman, Maniktala Municipality,
To—The Magistrate of the 24-Parganas, Alipore.

With reference to your letter No. $\frac{M.543}{1}$ of 1906, dated 14th June 1906, calling for a report on the working of the Licensed Jute Warehouses and Fire Brigade Act in the Municipality for the year 1905-1906, I have the honour to report that the share of expenditure allotted to this Municipality by the Commissioner of Police was Rs. 1,176. This was discharged by two instalments.

3. The annexed statement will show the number of warehouses and licenses issued during the year under review and in the previous year :—

4. License fees were levied on jute warehouses at 4 and 6 per cent. on the annual value and at 10 per cent. on trades of other descriptions mentioned above, and the fees were duly paid off.

5. The jute godowns, firewood, packing-case, hay, straw depôts are mostly situated near the circular canals which form the western and southern boundaries of this Municipality. Soorah jute mill is the only mill within this Municipality for the manufacture of gunny bags, situated in the north of Narcoldanga Main Road.

6. There was no fire in this Municipality during the year under review.

No. 136G.M., dated Garden Reach, the 22nd June 1906.

From—A. E. Shorter, Esq., Chairman, Garden Reach Municipality,
To—The Magistrate of the 24-Parganas, Alipore.

With reference to your No. $\frac{M.543}{1}$ of 1906, dated the 14th June 1906, I have the honour to submit the following report on the working of the Licensed Jute Warehouse and Fire Brigade Act in this Municipality for the year 1905-1906.

2. During the year under report licenses were granted to 33 warehouses including ropery, wood, fire-wood and straw depôts, etc., and the total amount of license fees realised was Rs. 1,957-12-0. The amount paid to the Commissioner of Police for maintenance of the Calcutta Fire Brigade was Rs. 1,958. There was thus a deficit of aannas 4 only to be met from the general funds of the Municipality.

3. No fire broke out within the Municipality during the year under review.

4. The year under review witnessed the installation of a Manual Fire Engine with accessories and a staff of men to work it at the Garden Reach Thana, and it was hoped that they would be permanently installed there, but owing to the reputed unhealthy state of the tank in the Police compound the men and engine were taken away and were absent for about six months. The tank has been filled up recently and the men and engine have been relocated at this station for the past six weeks, and it is hoped they will now be allowed to remain, as with the fire engine at Watgunge, there is every probability that Dock bridge might be opened when the engine was required, and the delay thus caused in getting the engine to Garden Reach might be disastrous.

5. The annexed statement will show the number of ware houses within the Municipality to which licenses were granted during the year 1905-1906 and the amount of fees levied from them.

RESOLUTION ON THE ANNUAL REPORT OF THE WORKING OF THE CO-OPERATIVE CREDIT SOCIETIES IN BENGAL FOR THE YEAR 1905-1906.

REVENUE DEPARTMENT—LAND REVENUE.

Calcutta, the 11th August 1906.

RESOLUTION—No. 2466—L.R.

READ—

A Report No. 255C.C.S., dated the 12th of April 1906, from Mr. W. R. Gourlay, on the working of the Co-operative Credit Societies for the year ending the 31st March 1906; and a Supplementary Report No. 408C.C.S., dated the 16th July 1906, from Mr. L. E. B. Cobden-Ramsay, on the same subject.

Read again—

Government Resolution No. 3032T.—R., dated the 9th September 1905, on the Registrar's report for 1904-05.

THIS is the second report submitted by the Registrar, but it is the first of its kind dealing with societies registered under Act X of 1904.

2. The report was due to Government on the 1st July. Mr. Gourlay, the Registrar, before he proceeded on leave, submitted a preliminary report on the 12th April last, but it was not possible to prepare statistics by that date. The compilation of the statistics and the preparation of a review of them was, therefore, left to his *locum tenens*, Mr. Cobden-Ramsay, who was unable to submit them until the 19th July, and the report as a whole did not reach Government till the 27th idem. The statistics now submitted are not in all cases complete, and the figures of seven societies were not before Mr. Ramsay when he prepared his review. The reports submitted are clear and concise, and it is unnecessary to review them in detail.

3. Mr. W. R. Gourlay was in charge of the Department, in addition to his duties as Private Secretary to His Honour the Lieutenant-Governor, from the beginning of the year till the end of July, when Mr. L. E. B. Cobden-Ramsay was appointed Registrar and acted as such till Mr. Gourlay relieved him in December. Messrs. Gourlay and Cobden-Ramsay spent 157 days on tour and visited all the districts of the Province, except Burdwan, Hooghly, Jessore, Khulna, Murshidabad and Bhagalpur.

4 The year 1905-06 opened with 67 unregistered societies. Eight of these were situated in districts which have been transferred to the Province of Eastern Bengal aud Assam. Five societies (Majnamutha, Chakdhi, Dalsingsérai, Baktiarpur and Baltara) ceased to exist owing to various circumstances. Two more—Chenny and Loopoongtooly—were amalgamated with the Rampur Society. Of the remaining 52 societies, 19 were registered during the year, 38 new societies were also registered during the year, and at its close 90 societies in all—registered and unregistered—stood on the list as against 67 in the preceding year.

5. The number of members of the societies amounted to 4,617 as against 3,280 in 1904-05, and the number of loans granted rose from 1,737 in 1904-05, to 2,595 in the year under review. The members of the different societies varied from 10 to 357, and the amount of capital from Rs. 100 to Rs. 2,000.

6. The unequal distribution of loans was one of the points to which attention was drawn in paragraph 5 of the Government Resolution on the Report for 1904-05. In that year the loans varied from Re. 1 to Rs. 101. In the year under review, the unevenness of the distribution of loans was even more marked, being from Re. 1 to Rs. 265 in the rural societies, and from Rs. 5 to Rs. 550 in the case of the urban societies. Mr. Cobden-Ramsay notes that variation is bound to continue till it is found by experience that the poorer members are as prompt as their well-to-do brethren in repaying

the loans granted to them, as the question of security must influence the Committees in granting loans. Moreover, in urban societies, which are practically "Limited Companies," the distribution varies according to the number of shares held by each member.

7. The societies were financed either by loans (with or without interest) from Government and from private parties and by deposits made by the members. Rupees 3,210 were granted to registered societies free of interest for three years in accordance with paragraph 26 of the Resolution of the Government of India, dated the 20th April 1904, on deposits of equal amounts being made by the members. Rupees 5,457 were lent by Government on interest at 6¼ per cent. to societies in Government estates, and Rs. 15,829 were advanced by other parties. Of the latter amount, Rs. 10,355 went towards financing the registered societies, and the balance of Rs. 5,474 to help the unregistered societies. The details of these are given on the margin.

„ Gulab Chand	786

Bettiah Raj	300
	5,474

The deposits made by the members amounted to Rs. 8,614 as against Rs. 3,181 in 1904-05.

8. The rate of interest which the societies charged on loans granted to members was generally 12½ per cent. as in last year, but Mr. Gourlay shows in paragraph 6 of his report that in some cases it is better for a society to charge 18¾ per cent. on lending out money borrowed locally, than to borrow money from outside sources and lend it out at a lower rate.

9. The societies worked on the whole at a profit. The total assets amounted to Rs. 47,786-6-10, and their liabilities to Rs. 44,276-4-7⅓, thus leaving a profit of Rs. 3,510-2-2⅔ as against Rs. 1,955-1-6⅓ in the preceding year.

10. These results indicate that the scheme is progressing steadily, but much depends on the zeal and sympathy of local officers. It has succeeded most in the districts of the Bihar, Orissa and Chota Nagpur Divisions and in the district of Midnapore. Mr. Gourlay thus describes the causes of this success :—

"With few exceptions, all the societies which are at present working are founded on the credit which the individual member has within his village. That such a credit, founded on a character for honesty, exists is well known to all who are familiar with village life. The majority of the village transactions are done without a word in writing, and such debts are seldom repudiated. This credit, however, seldom extends beyond the limits of the village, and in many cases not even beyond the limits of the *tola*, or hamlet, in which the individual resides. It is this existing village credit which has to be organised, and when the villagers understand this, unlimited liability has no terrors for them; they accept the principle without question.

"The secret of financing agriculture in India is not in creating anything new but in organising the credit which already exists."

The scheme is being extended gradually on sound lines, and this will yield better results in the end than the establishment of a large number of societies in communities where the principle of co-operation is not properly understood. Of the two obstacles which hinder progress in these tracts, viz., the want of capital and the absence of men able to explain the principles to guide the villagers, the latter is the most serious, though it is hoped that in the large Christian communities of Chota Nagpur the requisite instruction may in time be furnished by the Missionaries and their assistants. As to capital, it is not too much to expect that others will follow the example of Rai Camaleswari Prasad Singh Bahadur, of Monghyr, and such is now being done by local *mahajans* in parts of Midnapore.

11. The Government of India in their Circular Order No. 7—30-4, dated the 29th May 1906, desired that the cases in which disputes about the recovery of loans from members were referred to the Registrar or were the

subject of arbitration should be noticed in the report. The Registrar reports that there were no such cases during the year. The Lieutenant-Governor agrees with Mr. Cobden-Ramsay and the Board that to allow loans to be recovered on the decision of the Registrar, as a public demand, would be likely to encourage careless granting of loans and to cause apathy among the Committees who manage the societies.

12. An effort was made during the year to establish grain societies and *golas* for seed grains, but the schemes have made little progress for the reasons given in paragraph 12 of Mr. Gourlay's report.

13. The Lieutenant-Governor desires to place on record his appreciation of the zeal and energy with which Messrs. Gourlay and Cobden-Ramsay performed their duties.

His Honour also notices with pleasure the valuable assistance given to the movement by Mr. Hopkyns, Subdivisional Officer of Bettiah, the Revd. Mr. Finch-White, of Hazaribagh, Babu Jamini Mohan Mitra, Deputy Collector of Midnapore, and Rai Camaleswari Prasad Singh Bahadur, of Monghyr.

ORDER.—Ordered that a copy of the Resolution be forwarded to the Board of Revenue for information and communication to the Registrar, Co-operative Credit Societies.

By order of the Lieutenant-Governor of Bengal,

R. W. CARLYLE,

Chief Secy. to the Govt. of Bengal.

The mean pressure, temperature, &c., are deduced from the traces of the Thermograph and from eye observations.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground. The rainfall reported on any day is for 24 hours preceding 8 A.M. of that day.

e, overcast; d, drizzling rain; p, passing temporary showers; t, thunder; ≤, lightning.

QUESTIONS AND ANSWERS.

THE PUSA AGRICULTURAL COLLEGE AND EXPERIMENTAL FARM.

The Hon'ble MR. SYED SHURFUDDIN asked:—

Will the Government be pleased to give the following information with regard to the staff employed in the Pusa Agricultural College and Experimental Farm:—

(*i*) Names.
(*ii*) Designation.
(*iii*) Qualifications.
(*iv*) Pay.
(*v*) Allowance, if any?

The Hon'ble MR. CARLYLE replied:—

"The Pusa Agricultural College and Experimental Farm is under the management of the Government of India, and this Government has no information in regard to the staff employed."

REPORT ON THE MARKET-RATES OF FOOD-GRAINS, &C.

The Hon'ble MR. SYED SHURFUDDIN asked:—

Will the Government be pleased to state the agency employed to ascertain and report the market-rates of food-grains, &c., published weekly in the Calcutta Gazette?

Is the Government aware that the rates so published in the Calcutta Gazette are not always the actual prevailing rates in the market?

If the Government is not aware of the fact, will it be pleased to institute an enquiry into the matter, and, if upon enquiry the reports are found inaccurate and defective, will the Government be pleased to state what action it proposes to take in the matter so as to ensure more accurate reports in the future?

The Hon'ble MR. CARLYLE replied:—

"The figures published each week in the Calcutta Gazette are obtained from the weekly weather and crop reports, which are submitted by the District Officers.

"Under the existing rules, in districts in which the Bengal Tenancy Act is in force, the prices are ascertained by a Gazetted officer not below the rank of a Sub-Deputy Collector, unless the Divisional Commissioner, for special reason, authorises the employment of a Kanungo. In other districts the District Officer exercises his discretion in selecting an officer for this duty.

"In a few cases it has come to the notice of Government that the rules had not been strictly followed in reporting prices, and the necessary steps have been taken to have the mistakes rectified; but there is no reason for supposing that the market prices are not generally ascertained with care before the reports are submitted.

"In the opinion of Government the present rules on the subject are sufficient. If any specific instance of prices being incorrectly reported be cited, enquiry will be made; but there is no evidence for the necessity of instituting any general enquiry."

INDUSTRIES OF BENGAL.

The Hon'ble MR. SYED SHURFUDDIN said:—

Considering the fact that the account of the industries of the Province as published under the heading of "Manufactures and Mines" in Chapter IV of the Administration Report of Bengal, 1904-05, is not complete, will the Government be pleased to direct the publication in future Administration Reports more details on this subject?

As a preliminary step will the Government be pleased to institute as soon as possible a general industrial survey of the Province to inquire into, among other things,—

(*i*) the existing industries, with the areas covered by each of them;

(*ii*) the dying or dead industries, with the causes of their present condition and suggestions for their revival, wherever that is possible;

(*iii*) the possibility of any new industry which may be suited to particular areas by virtue of their respective position and surroundings?

The Hon'ble MR. RICHARDSON replied:—

"As regards the first part of the question, if the Hon'ble Member will specify the further details which he considers should be given in order to complete the information in the Administration Report, Government will be glad, if the details are available and if space permits, to comply with his wishes.

"As regards the second part of the question, the Lieutenant-Governor does not consider it necessary at present to institute a general industrial survey of the Province. I lay on the table a copy of a report prepared by the Hon'ble Mr. Collin in 1890 on the existing arts and industries of Bengal and a copy of a Memorandum prepared in the Secretariat regarding the development of agriculture, and industrial, commercial and technical education in Bengal. Reference may also be made to Chapter XII of the report of the last Census of the Province, prepared by Mr. Gait, and to the statistical tables of the Census, numbered XV and XVI."

POLITICAL STATES IN CHUTIA NAGPUR.

The Hon'ble MR. SYED SHURFUDDIN asked:—

(*a*) Will the Government be pleased to lay on the table the report of the Officer who is mentioned as having been deputed to inquire into and report on the condition of the Political states in Chutia Nagpur (*vide* Administration Report of Bengal, 1904-05, Chapter I, paragraph 10)?

(*b*) Will the Government be pleased to state what change, if any, has been effected in the office establishment of the Commissioner of Chutia Nagpur after the transfer of seven of the Political states in that Division to the Central Provinces?

The Hon'ble MR. CARLYLE replied:—

"(*a*) Government is unable to lay on the table the reports, as they are Confidential.

"(*b*) Five and not seven States have been transferred from the Chutia Nagpur Division to the Central Provinces. Out of a staff of five Assistants originally employed in the Political side of the office of the Commissioner of Chutia Nagpur whose pay ranged from Rs. 25 to Rs. 100 *per mensem*, only one temporary clerk on Rs. 35 has been retained for work connected with the two Native States of Seraikela and Kharsawan which are still under the Commissioner."

PRISON REFORMS.

The Hon'ble MR. SYED SHURFUDDIN asked :—

Is the Government aware that His Honour the Lieutenant-Governor of the Punjab has recently issued an order in the course of which he lays it down as an axiom that if the law is properly administered, no boy under the age of fifteen years should in future ever become acquainted with the inside of a prison, and in noticing the reformatory system inaugurated in the Lahore and Montgomery Jails for the mental and physical training of juvenile adult convicts, His Honour fully agrees in the importance of dealing with the incipient criminal on special lines, while comparative youthfulness affords every prospect of reform, and sees no reason why the same success should not be attained in India as under the English system ?

Is the Government further aware that there are at present under the consideration of the Bombay Government important proposals regarding prison reform, such as complete separation of habituals from first-conviction prisoners, special treatment of juveniles and young adults up to twenty-five years of age, and provision of separate accommodation for under-trial prisoners ?

Will the Government be now pleased to state if it will consider the advisability of taking steps to introduce prison reforms on the lines indicated in the order of His Honour the Lieutenant-Governor of the Punjab, and the proposals under the consideration of the Bombay Government ?

The Hon'ble MR. RICHARDSON replied :—

"In reply to the first paragraph of the question, this Government is aware of the observations made by His Honour the Lieutenant-Governor of the Punjab.

"In reply to the second paragraph, this Government is not aware of the details of the proposals before the Bombay Government to which reference is made. The proposals, however, are not in their general scope of a novel character, and attention has been given in recent years in more than one quarter to the cognate subjects of the segregation and differential treatment of the various classes of prisoners.

"These subjects have not been lost sight of in this Province. The existing rules provide for the separation of prisoners, and steps have been and are being taken to remedy such defects as exist in this respect in the present jail buildings. The question has been again before the Government quite recently, and a report has been called for from the Inspector-General of Prisons. The Government has adopted and expressed the view that, except in special cases, juvenile offenders should not be sent to jail, but to the Reformatory schools. Various questions relating to these are now under consideration. As regards the training of young adults, a scheme is in contemplation in connection with the new Alipore Jail, and it is hoped that it will be found possible to give effect to it."

COMMISSIONERSHIP OF MUZAFFARPUR.

The Hon'ble MR. SYED SHURFUDDIN asked :—

Will the Government be pleased to state as to when the scheme of the formation of a separate Commissionership at Muzaffarpur is going to be given effect to ?

The Hon'ble MR. CARLYLE replied :—

"The matter is now under the consideration of the Government of India."

THE REGISTRATION DEPARTMENT.

The Hon'ble MR. SYED SHURFUDDIN asked :—

Will the Government be pleased to lay on the table the papers relating to the re-organization of the Registration Department ?

The Hon'ble MR. CARLYLE replied :—

"The papers are laid on the table."

CONSTRUCTION OF A TRAMWAY SERVICE IN THE COSSIPORE-CHITPUR MUNICIPALITY.

The Hon'ble MR. BERTRAM asked :—

Will the Government be pleased to state if sanction has been accorded to the proposals of the Cossipore-Chitpur Municipality in the matter of the Calcutta Tramways Company's Scheme to extend the services of that Company to points within the jurisdiction of that Municipality?

If not, will the Government veto the resolutions passed by the Cossipore-Chitpur Municipality purporting to sanction the Calcutta Tramways Company's Scheme, and direct that the Cossipore-Chitpur Municipality, at a Special General Meeting convened in accordance with the Bengal Tramways Act, 1883, section 3, should fairly and thoroughly re-consider the two schemes, *viz.*, that of the Calcutta Tramway's Company for a passenger service only, and Babu Nibaran Chunder Dutt's for a combined passenger and goods service in the locality?

Is it not a fact that the Cossipore-Chitpur Municipality have disregarded the express instructions of the Presidency Commissioner and the opinion of the Commissioner of Police as to the public safety and convenience of the last mentioned scheme, and have ignored the representations of the Mercantile community concerned in the jute trade in its favour?

The Hon'ble MR. CARLYLE replied :—

"The Commissioners of the Cossipur-Chitpur Municipality decided after full consideration that the Calcutta Tramways Company should be allowed to make an application to Government for permission to construct a Tramway to be worked by electric traction within the Municipality, and the Commissioner of the Presidency Division was informed in March last that Government would await the submission of a formal application from the Calcutta Tramways Company. The present Commissioner of the Presidency Division, Mr. Collin, is of opinion that the decision of the Municipal Commissioners should be accepted, though it is understood that one of his predecessors and the Commissioner of Police were in favour of Babu Nibaran Chunder Dutt's scheme which the Municipal Commissioners rejected in favour of that put forward by the Calcutta Tramways Company. The former application of the Calcutta Tramways Company has not yet been submitted to Government. Meanwhile the question is being considered by Government."

PORT HOSPITAL DUES.

The Hon'ble MR. BERTRAM asked :—

Will the Government kindly lay on the table abstracts of the closed accounts of the Port Hospital Dues for the year ended 31st March, 1906, and for the quarter ended 30th June, 1906?

The Hon'ble MR. INGLIS replied :—

"The statements asked for are laid on the table."

THE BOILER FUND.

The Hon'ble MR. BERTRAM asked :—

(*a*) Will the Government kindly state the full amount standing to the credit of the Boiler Fund in its hands on 31st March last, and the surplus accruing to the Fund from the working for the year ended 31st March, 1906?

(*b*) Is there any objection to lay on the table a full statement of accounts to 30th June, 1906?

(*c*) Is it a fact that the expenses of the Smoke Commission were debited to the Boiler Fund, and is it intended to charge the Fund with the fees of the Commissioners appointed under the Smoke Nuisances Act?

(*d*) If so, under what authority have such charges been debited or will be debited to the Boiler Fund?

The Hon'ble MR. INGLIS replied :—

"(*a*) The treasury accounts for 1905-06 have not been finally closed yet; but, as at present ascertained, the balance at credit of the fund on 31st March, 1906, was Rs. 87,389-4. The opening balance on 1st April, 1905, was Rs. 85,210-11-11, the surplus on the working of the year thus being Rs. 2,178-8-1.

"(*b*) The statements of receipts and disbursements for the months of April, May and June, 1906, are placed on the table.

"(*c*) Expenditure in connection with the Smoke Commission during the current year has been temporarily debited to the Boiler Fund, as a separate head of account was not provided in the Provincial Budget for the current year. This will be provided for in the revised estimates for the current year, and the expenditure on the Smoke Commission will be written back and adjusted as a charge against Provincial Revenues."

STEAM PILOT VESSEL FOR THE SANDHEADS.

The Hon'ble MR. BERTRAM asked :—

Has the Government yet decided to allot funds in the Budget of 1907-1908 for the provision of a second steam pilot vessel at the Sandheads? If not, why not?

The Honble MR. INGLIS replied :—

"Government is alive to the importance of providing a second steam pilot vessel and it will be ordered as soon as the state of the Provincial finances permits of the necessary outlay being met. The Budget for 1907-08 will not come under consideration till December."

IMPROVEMENT OF TOLLY'S NULLAH.

The Hon'ble MR. BERTRAM asked :—

Will the Government kindly declare their policy regarding the improvement of Tolly's Nullah with a view to make that waterway more generally useful to the trade of Calcutta?

In the meantime will instructions be issued to the officer in charge to do all that is possible to keep the channel open to allow of the passage of boats carrying rice and other produce up and down the Nullah at any state of the tide?

The Hon'ble MR. INGLIS replied :—

"In May, 1904, this Government submitted to the Government of India a scheme for a canal from the Bidyadhari river to the Hooghly, to be of size sufficient to accommodate the steamers and flats which ply to Assam. This scheme involves the canalization of Tolly's Nullah. The cost was roughly estimated at Rs. 1,55,00,000, including charges for plant and for establishment.

"The Government of India in August, 1904, intimated that while they agree that it is desirable to improve Tolly's Nullah, the outlay proposed was too great to allow of the acceptance of the scheme. The matter then remained in abeyance. Last January the Government of India asked that certain alternative proposals in connection with the scheme might be considered. This has been done and a report has recently been sent to the Government of India.

"This Government is anxious to carry out the scheme if it can be brought within practicable financial limits.

"Tolly's Nullah under existing conditions must remain liable to interruptions of traffic. It rapidly shoals at the point where the tides which enter from both ends meet. There is not enough space to use dredgers, and to clear the shoal it is necessary to block and de-water the channel. This has been done quite recently at a cost of Rs. 33,000, and it will have to be re-done after two years.

"It is a physical impossibility to keep the channel open at all states of the tide. It is with difficulty that it is kept open at high tide. The importance of the channel to the rice trade is well known, and what can be done at reasonable cost will be done."

FISHERIES IN BENGAL.

The Hon'ble MR. BERTRAM asked:—

Will the Government be pleased to state what progress has been made towards instituting a thorough investigation into the fisheries around the coasts and in the inland waters of Bengal as promised by His Honour Sir Andrew Fraser in his speech on the last Bengal Budget?

The Hon'ble MR. CARLYLE replied:—

"Mr. K. G. Gupta, Member of the Board of Revenue, has been appointed to make inquiries into the possibility of improving and developing the fisheries in Bengal. A copy of this Government letter No. 1780T.R., dated the 26th July, 1906, containing the instructions which have been issued to him on the subject, is laid on the table."

UPKEEP OF NAVIGABLE CHANNELS BETWEEN CALCUTTA AND EASTERN BENGAL.

The Hon'ble MR. BERTRAM asked:—

(*a*) Will the Government be pleased to state if it can see its way to recommend to the Supreme Government the creation of a special Department of the Public Works, as suggested in Council by the Hon'ble Mr. Nimmo, to deal with the Ganges-Brahmaputra-Megna System of Rivers and their connected Canals, which department should be responsible for all surveys, dredging schemes, and general upkeep of the navigable channels?

(*b*) In view of the importance of the subject to the community in general and the necessity of securing continuity of policy, if there is to be any real progress in the development of Eastern Bengal and Assam Waterways on the lines of other countries, will the Government be pleased to discourage as much as possible changes of *personnel* in the Irrigation Department within its jurisdiction; and also will the Government bring its good offices to bear on the Government of Eastern Bengal and Assam to the same end?

The Hon'ble MR. INGLIS replied:—

"(*a*) This important question has been considered by this Government. As at present advised, the Lieutenant-Governor is inclined to advocate that a Committee should be appointed to investigate the requirements of trade, the possibilities of the channels and the outlay involved, and that a special staff should be employed on such works as may be found feasible.

"(*b*) A Joint Committee has already been appointed to advise Government on questions relating to the channels between Calcutta and Eastern Bengal. On this Committee the Government of Eastern Bengal and Assam is represented and so are the Steamer Companies. It is hoped that this will tend to insure a continuity of policy. Changes in the *personnel* of the staff are and will be avoided as far as practicable."

THE RANCHI MODEL COLLEGE.

The Hon'ble MR. CHAUDHURI asked :—

(*a*) Will the Government be pleased to state how far the Ranchi Model College scheme has progressed ?

(*b*) Are the College and School buildings and the Boarding Houses under actual construction, and, if so, what progress has been made in respect of each ?

(*c*) How much has been spent by Government up to now on the proposed College scheme, and how much public subscription has been promised and collected for the same ?

(*d*) Is there any foundation for the announcement in the public Press that the Secretary of State has withheld his sanction to the Ranchi Model College scheme ?

The Hon'ble MR. RICHARDSON replied :—

"(*a*) The answer to the first of the series of questions put by the Hon'ble Member is contained in the answers which I am about to give to the remaining questions.

"(*b*) There are no buildings under actual construction.

"(*c*) It has been ascertained that up to date the preliminary expenditure in connection with the proposed Model or Arts College at Ranchi amounts to Rs. 28,000 (for materials). No actual award has been made in connection with the acquisition of land.

"The subscriptions to the College scheme which have been promised amount to Rs. 3,12,897, of which Rs. 2,48,897 have been paid and are in deposit in the Bank of Bengal.

"(*d*) From the correspondence which has been published in the daily Press, it will appear that the proposal has not been referred to His Majesty's Secretary of State."

THE NORTHERN SALT LAKE.

The Hon'ble MR. CHAUDHURI asked :—

(*a*) Is it not a fact that the Northern Salt Lake has long been regarded as a source of danger to the health of the Northern Calcutta and the suburbs ?

(*b*) Has not that danger greatly increased of late by its being converted into a receptacle for the deposit of solid sewage of Calcutta ?

(*c*) Have not the constructions of the fishery *bheries* materially obstructed the free drainage of the suburbs ?

The Hon'ble MR. INGLIS replied :—

"(*a*) & (*b*) This is a matter regarding which there is a divergence of opinion and Government is not at present advised that there is any danger to the health of Calcutta from the Salt Lakes.

"(*c*) The existence of the fishery *bheries* cannot be said to obstruct the drainage of the suburbs. The *bheries* have been in use for many years and are not of recent construction."

THE DANTIA KHAL.

The Hon'ble MR. CHAUDHURI asked:—

(*a*) Will the Government be pleased to state the cause of the deterioration and the silting up of the Dantia Khal in the Baranagore Municipality, and is it not a fact that the health of the area has suffered greatly consequent to the silting up of the khal?

(*b*) Is it not the case that the Northern Salt Lake can be reclaimed with considerable improvement in the health and drainage of the North and the North-East suburbs of Calcutta without the least interference with the Calcutta sewage system?

(*c*) Is not the improvement of these suburbs urgent for the housing of the poor who are constantly being unhoused and are likely to be unhoused in larger numbers by the Town Improvement Scheme?

The Hon'ble MR. INGLIS replied:—

"(*a*) The silting of the Dantia Khal is due to natural causes. The flood tide brings up silt which the ebb tide is unable to carry back completely. There is no information before Government to indicate that the silting of the khal has been injurious to the health of Baranagore. Administrative sanction has been given by Government to a scheme for the better drainage of this Municipality.

"(*b*) In the opinion of Government it is improbable that the Northern Salt Lake could be reclaimed without interfering with the outfall of the Calcutta sewage system. The reclamation would not, in itself, have any effect on the drainage of the suburbs.

"(*c*) It is certainly desirable to improve the suburbs of Calcutta, and this is a matter which will continue to receive attention."

THE SUBURBAN DRAINAGE.

The Hon'ble MR. CHAUDHURI asked:—

Will the Government be pleased to lay on the table a brief note setting out the views and opinions of Colonel Randall, Colonel Haig, Mr. Whitfield, Mr. Hughes, Mr. Vertannes, Mr. Buckley and Mr. Horn regarding the improvement of the suburban drainage and the reclamation of the Salt Lakes?

The Hon'ble MR. INGLIS replied:—

"A copy of a volume of selections from the Records of the Bengal Government containing papers from 1865 to 1904, relating to the Circular and Eastern Canal, is laid on the table. In this the correspondence relating to proposals for the reclamation of the Northern Salt Lake is given at length."

THE LOWER GANGES CANAL.

The Hon'ble MR. CHAUDHURI asked:—

Will the Government place on the table a brief note as to how the drainage questions of the Presidency Division were proposed to be dealt with in connection with the Lower Ganges Canal Project by Colonel Searle, Mr. Long, Mr. Kimber and Mr. Hughes?

The Hon'ble MR. INGLIS replied:—

"The project for the Lower Ganges Canal was for a navigable canal. The drainage problems of the Presidency Division were not dealt with in it."

THE SALT LAKE CHANNEL.

The Hon'ble MR. CHAUDHURI asked:—

Considering the fact that the deterioration of the Salt Lake Channel is fast going on, will the Government consider the advisability of the construction of an out-fall sluice near Haroa and connect it with Haroa Gang (River), a few miles north of Kulti Lock ?

The Hon'ble MR. INGLIS replied:—

"It is not fully understood how the proposal submitted would bear on the improvement of the Salt Lake channel. The Government will be glad to consider any proposals which may be calculated to effect the improvement of that channel."

LEVELS OF THE WATER IN THE HOOGHLY AT BARANAGORE, &c.

The Hon'ble MR. CHAUDHURI asked:—

(*a*) Will the Government be pleased to state the levels in reference to mean sea datum of the highest and the lowest water during flood season of Hooghly at Baranagore and of the Haroa Gang at Haroa ?

(*b*) Will the Government be pleased to lay the above question for the consideration of the Commission appointed for enquiry into the drainage of the Presidency Division and appoint a drainage expert with local knowledge to assist the deliberation of the Commission ?

The Hon'ble MR. INGLIS replied:—

"(*a*) Information regarding the exact levels of the water in the Hooghly at Baranagore is not available. A statement is, however, laid on the table which gives the comparative levels of the water at Chitpur and at Haroa for the period mentioned.

"(*b*) The Drainage Committee will consider all schemes for drainage brought before it, and will seek assistance from local officers or other persons having any special acquaintance with drainage questions."

THE DARJEELING MURDER CASE.

The Hon'ble MR. CHAUDHURI asked:—

Has the attention of the Government been drawn to the judgement of the High Court in the Darjeeling murder case and the comments therein of the conduct of the Police in connection with the case? Will the Government take such measures as would serve as a warning against the recurrence of such negligence and similar questionable conduct and practices on the part of investigating officers?

The Hon'ble MR. CARLYLE replied:—

"The attention of Government has been drawn to the judgement of the High Court in the Darjeeling murder case and full consideration will be given to the matter with a view to the issue of such orders as may appear to be advisable."

THE SAMBALPUR CIVIL COURTS BILL, 1906.

The Hon'ble MR. RICHARDSON moved for leave to introduce a Bill to declare the law relating to Civil Courts in the district of Sambalpur. He said:—

"The law under which the Civil Courts in the district of Sambalpur are now constituted is the Central Provinces Courts Act of 1904, with certain modifications introduced by the Bengal and Assam Laws Act of 1904. The object of the present Bill is stated in the Statement of Objects and Reasons appended to it, and I have little to add. The arrangements in force are not only anomalous, but in some respects unworkable, as a single instance will show. The effect of the Bengal and Assam Laws Act is to substitute for the words 'Judicial Commissioner of the Central Provinces,' wherever those words occur in the Central Provinces Act, the words 'High Court of Judicature at Fort William in Bengal.' Now one provision of the Central Provinces Act runs as follows:—'The Judicial Commissioner shall be appointed by the Governor General in Council.' The substitution of the High Court for the Judicial Commissioner in this provision is obviously incompatible with the constitution of the High Court. In view of this and other results of the present state of the law, the Hon'ble Judges have pressed the Government to undertake legislation and to push it through as fast as possible. The Bill which I ask leave to introduce has been framed in consequence, and, I may add, has received the approval of the High Court."

The Motion was put and agreed to.

The Hon'ble MR. RICHARDSON introduced the Bill and moved that it be read in Council.

The Motion was put and agreed to, and the Secretary accordingly read the title of the Bill.

The Hon'ble MR. RICHARDSON also moved that the Bill be taken into consideration. He said:—

"The List of Business gives two separate motions, one for suspension of the Rules of Business to admit of the Bill being considered and passed at this meeting, and the other for the consideration of the Bill.

"If notice had been given before this meeting that any amendment would be moved, objection might have been taken under Rule 44 to the immediate passing of the Bill.

"No notice, however, having been given of an intention to propose any amendment, it is unnecessary to suspend any rule, for the Rules allow the course it is now proposed to follow and which it is desirable to adopt in view of the urgency of the case. As I have said, the Hon'ble Judges of the High Court

have expressed the wish that the Bill should be passed with the least possible delay. I beg, therefore, to move that the Bill be taken into consideration."

The Motion was put and agreed to.

The Hon'ble MR. RICHARDSON also moved that the Bill be passed.

The Motion was put and agreed to.

The Council was then adjourned *sine die*.

PART VI.

Bills introduced into the Council of the Governor General for making Laws and Regulations, or published under Rule 23.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

The following Bill was introduced in the Council of the Governor General of India for the purpose of making Laws and Regulations on the 10th August, 1906:

No. 4 of 1906.

A Bill to amend the Land Improvement Loans Act, 1883, and the Agriculturists' Loans Act, 1884.

WHEREAS it is expedient to amend the Land Improvement Loans Act, 1883, and the Agriculturists' Loans Act, 1884; It is hereby enacted as follows:

XIX of 1883. XII of 1884.

1. This Act may be called the Land Improvement and Agriculturists' Loans (Amendment) Act, 1906.

Short title.

2. In section 1, sub-section (*2*), and in section 4, sub-section (*2*), clause (*f*), of the Land Improvement Loans Act, 1883, the words "with the previous sanction of the Governor General in Council" shall be omitted.

Amendment of sections 1 and 4, Act XIX, 1883. XIX of 1883.

3. In section 6, sub-section (*3*), of the said Act, the words "and Governor General in Council" and the words "and sanctioning" shall be omitted.

Amendment of section 6 of same Act.

4. In section 10 of the said Act, for the words "with the previous sanction" the words "subject to the control" shall be substituted.

Amendment of section 10 of same Act.

5. In the first proviso to section 11 of the said Act, the words "with the approval of the Governor General in Council" shall be omitted.

Amendment of section 11 of same Act.

6. In section 4, sub-section (*1*), of the Agriculturists' Loans Act, 1884, for the words "with the previous sanction" the words "subject to the control" shall be substituted.

Amendment of section 4, Act XII, 1884. XII of 1884.

STATEMENT OF OBJECTS AND REASONS.

UNDER the law as it at present stands Local Governments are required to submit all rules under the Land Improvement Loans Act, 1883 (XIX of 1883), and the Agriculturists' Loans Act, 1884 (XII of 1884), for the previous sanction of the Governor General in Council. In a recent Resolution the Government of India have clearly laid down the lines upon which the takavi system of State loans to agriculturists should be worked, and it is now considered sufficient to retain only a general control of the Governor General in Council such as is proposed in the amendment to section 10 of the Land Improvement Loans Act, 1883, and to section 4 (*1*) of the Agriculturists' Loans Act, 1884, without requiring the rules made by Local Governments to be submitted for his previous sanction. The opportunity has also been taken to unfetter the discretion of Local Governments as regards certain matters under the Land Improvement Loans Act by omitting references to the "Governor General in Council" in certain sections of the Act.

DENZIL IBBETSON.

Secretary to the Government of India.

Caution—Vladivostock approach—Submarine mines.

No. 288 (second publication).—The British Admiralty has given notice (No. 737 of 1906) that submarine mines were laid during the late war between Russia and Japan by both belligerents, extending apparently as far southward in Ussuri bay as a line joining Askold island to the Rimskago Korsakofa islands, a distance of about 40 miles. Vessels, therefore, bound to Vladivostock should make cape Gamova. According to a Berlin Notice, the route thence to be followed is to pass westward of Rimskago Korsakofa, Stenin, and Tsivolko, with Popova and Kozakevicha close aboard, to the Eastern Bosporus.

REPORT ON THE COTTON CROPS OF BENGAL, AUGUST 1906.

[On an average of the five years ending 1904-1905 the area under cotton crops in the territory to which this forecast relates has represented some 0·6 per cent. of the total area under Cotton Crops in India.]

Explanatory.—Of the four forecasts on cotton that are to be issued at intervals of every two months from 15th August under the orders of the Government of India, the first two, *e.g.*, the August and the October forecasts, as

explained last year, deal only with the estimates of area sown and the general condition of the crop, while the two remaining ones, *e.g.*, the December and the February forecasts, deal with the revised estimates of area sown, together with an estimate of the probable outturn.

The August forecast should deal with the early cotton crop, but in some districts of the Province, notably in the Patna Division, the late crop is also partly sown before August. This forecast, therefore, while dealing mainly with the early crop, also shows the extent of sowings of the late crop in that Division.

2. *Character of the Season.*—The weather has so far been favourable almost everywhere and the crop is promising well. Sowings generally took place in the normal season, *i.e.*, in June and early in July. In Sambalpur, where only early cotton is grown, some damage is reported to have been done by caterpillars.

It may be noted here that the cotton crop suffers in this Province more from excessive rain than from want of rain. In the present season the dryness of the weather has therefore been favourable to the crop.

3. *Area sown.*—The appended table summaries the district reports and gives the five and ten years' averages of early cotton in the Province as 62,130 acres and 77,825 acres, respectively. The area sown this year is 37,362 acres against 35,385 acres of last year (1905).

As for the late crop the five and ten years' averages are 42,022 acres and 60,001 acres, respectively. The area sown up to now is 23,774 acres against 36,356 acres returned as the total sowings of last year.

SUMMARY OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN BENGAL, AND IN EASTERN BENGAL AND ASSAM, FOR THE MONTH OF JULY 1906.

THE month of July opened with a fairly steep pressure gradient over the Bay, and a shallow barometrical depression lying over the United Provinces with a centre near Allahabad. At the same time the irregular winds in the north-west angle afforded evidence of a tendency towards the formation of a depression in the Bay. The winds, however, reverted to their normal directions, and all signs of disturbed weather disappeared. The shallow depression in the United Provinces moved slowly westward during the next few days and filled up. Its influence on the Meteorology of Bengal was but slight, determining every position of the eastward limit of the Bombay current and was affecting in consequence the rainfall in Bihar and Chota Nagpur. The Bay current in the early part of the month was weak, but showed a slight tendency to increase in strength about the 7th of the month. At this period and until about the 12th pressure was abnormally high at the head of the Bay, and as is usually the case the monsoon current was deflected from Burmah into North-East India. At the same time a trough of low pressure lying along the base of the hills gave rise to general rain in North Bengal, Bihar and Assam.

On the 15th the shape of the isobars at the head of the Bay indicated that conditions were favourable for the formation of a depression, and on the 16th the northerly components in the winds at Saugor Island and along the Orissa coast proved that this anticipation was being realised. This disturbance developed somewhat slowly, and probably in the early stages of its formation was some distance from the coast. Its centre on the 17th was in the latitude of Gopalpur, and after moving slowly in a north-westerly direction it crossed the coast near Puri on the 21st. It was accompanied by very strong winds to the south and south-east, but the rainfall associated with it was not heavy as far as the Bay current was concerned. It continued in its north-westerly path accross Orissa into the Central Provinces outside the region of this report. On the 23rd the usual rapid rise of pressure in the rear of the storm followed, but on the 24th a check in the recovery of the pressure and a north-westerly wind at Saugor Island gave rise to suspicions that another disturbance was in the process of formation. On the next day it became clear that a small storm had formed in the north-east angle, which moved in a northerly direction and crossed the coast near Barisal early in the mroning of the 26th. Its centre passed about 70 miles to the north of Calcutta and gave heavy rain there. Although shallower than its predecessors, it exerted much more influence on the rainfall of Bengal, and before it passed into the United Provinces on the 30th and filled up, gave very heavy rain in South-West Bengal, Chota Nagpur and Bihar, and carried the monsoon current usefully over the greater part of the area to the north of the Bay.

Summary of Rainfall.—The rainfall work of the Province has been placed in the hands of the Director of Agriculture, Bengal, and the usual data regarding the actual and normal rainfall during the month will be published by that Department.

Summary of Temperature.—The mean temperature of the month was in excess of the normal mean by small amounts in every district in the area under report. The highest shade temperature recorded during the month amounted to 98·6 degrees, and was recorded at Silchar. In Calcutta the highest temperature recorded was 92.·9 and the lowest 74°.4.

The following table gives the Summary of the temperature of each of the seven Meteorological Divisions of the Provinces of Bengal and of Eastern Bengal and Assam for the month of July 1906.

The mean pressure, temperature, &c., are from eye observations.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground. The rainfall reported on any day is for 24 hours preceding 8 A.M. of that day.

o, overcast; t, thunder; <, lightning; d, drizzling rain; p, passing temporary showers; g, gloomy.

If any Candidate is prevented by sickness or any other adequate cause from attending such examination, the Commissioners may, with the concurrence of the Secretary of State for India in Council, allow him to appear at the Final Examination to be held in the following year, or at a special examination.

10. The selected Candidates will also be tested during their probation as to their proficiency in Riding.

The examinations in riding will be held as follows:—

Candidates who fail to obtain 100 marks, but are reported by the Civil Service Commissioners to have reached a minimum standard of proficiency in riding, and are certified by the said Commissioners to be entitled to be appointed to the Civil Service of India, will, on their arrival in India, be subjected to such further tests in riding as may be prescribed by their Government and shall receive no increase to their initial salary until they have passed such tests to the satisfaction of that Government.

11 The selected Candidates who, on examination, shall be found to have a competent knowledge of the subjects specified in Regulation 9, and who shall have satisfied the Civil Service Commissioners of their eligibility in respect of nationality, age, health, character, conduct during the period of probation, and ability to ride, shall be certified by the said Commissioners to be entitled to be appointed to the Civil Service of India, provided they shall comply with the regulations in force, at the time, for that Service.

12. Persons desirous to be admitted as candidates must apply on Forms, which may be obtained from "The Secretary to the Civil Service Commissioners, London," at any time after the 1st December, in the year previous to that in which the Examination is to be held No person will be admitted to the Examination from whom the Secretary to the Civil Service Commissioners has not received on or before the 1st July (or, if that date should fall upon a Sunday or public holiday, then, on or before the first day thereafter on which their office is open), in the year in which the Examination is to be held, an application, in the handwriting of the Candidate, on the prescribed form.

The Civil Service Commissioners are authorized by the Secretary of State for India in Council to make the following announcements:—

(i). *Selected Candidates will be allotted to the various provinces upon a consideration of all the circumstances, including their own wishes; but the requirements of the Public Service will rank before every other consideration.*

(ii) *An allowance amounting to £100 will be given to all Candidates who pass their probation at one of the Universities or Colleges which have been approved by the Secretary of State, viz., the Universities of Oxford, Cambridge, Dublin, Glasgow, Edinburgh, St. Andrews, and Aberdeen; Victoria University, Manchester; University College, London; and King's College, London; provided such Candidates shall have passed the Final Examination to the satisfaction of the Civil Service Commissioners, and shall, in the opinion of the Secretary of State, have conducted themselves well and complied with such rules as may be laid down for the guidance of selected Candidates. The whole probation must ordinarily be passed at the same Institution. Migration will not be permitted except for special reasons approved by the Secretary of State.*

(iii) *The allowance of £100 will not be paid to any selected Candidate until he has been certified by the Civil Service Commissioners to be entitled to be appointed to the Civil Service of India; and every Certified Candidate must, before receiving his allowance, give a written undertaking to refund the amount in the event of his failing to proceed to India.*

(iv) *All Candidates obtaining Certificates will be also required to enter into covenants, by which, amongst other things, they will bind themselves to make such payments as under the rules and regulations for the time being in force they may be required to make towards their own pensions or for the pensions of their families. The stamps payable on these covenants amount to £1.*

(v) *The seniority in the Civil Service of India of the selected Candidates will be determined according to the order in which they stand on the list resulting from the combined marks of the Open Competitive and Final Examinations.*

(vi) *Selected Candidates will be required to report their arrival in India within such period after the grant of their Certificate of Qualification as the Secretary of State may in each case direct.*

(vii.) *Candidates who fail to satisfy the Civil Service Commissioners at the Final Examination held in any year will be definitely rejected, and will not be allowed to present themselves for re-examination, unless it shall appear to the Secretary of State in Council, after reference to the Civil Service Commissioners, that such failure is due to circumstances wholly exceptional and beyond the control of the Candidate.*

N.B.—A Manual of Rules and Regulations applicable to members of the covenanted Civil Service of India has been compiled by permission of the Government of India and may now be procured either from Messrs. A. Constable & Co., 16, James Street, Haymarket, S. W., or from Mr. E. A. Arnold, 37, Bedford Street, Covent Garden. Price 2*s.* 6*d.*

The Commissioners have been requested by the Secretary of State for India to draw the attention of selected Candidates to the prefatory note attached to this manual, as it is considered important that it should be clearly understood that this compilation is not to be regarded in any other light than that of a collection, made for facility of reference, of certain information and rules, that it is by no means exhaustive, and that it is liable to such modifications as may from time to time be sanctioned by competent authority.

[*Copies of this paper may be obtained on application to the Secretary to the Government of India, Home Departments.*]

CIVIL SERVICE OF INDIA; CLERKSHIPS (CLASS I.) IN THE HOME CIVIL SERVICE; AND EASTERN CADETSHIPS.

SYLLABUS showing the extent of the Examination in certain subjects for 1907.

English Composition.—An Essay to be written on one of several subjects specified by the Civil Service Commissioners on their Examination Paper.

English Language and Literature.—The Examination will be in two parts. In the one the Candidates will be expected to show a general acquaintance with the course of English Literature, as represented (mainly) by the following writers in verse and prose, between the reign of Edward III and the accession of Queen Victoria :—

Verse—Chaucer, Langland, Spenser, Shakespeare, Milton, Dryden Pope, Gray, Collins, Johnson, Goldsmith, Crabbe, Cowper, Campbell, Wordsworth, Scott, Byron, Coleridge, Shelley, Keats.

Prose—Bacon, Sir Thomas Browne, Milton, Cowley, Bunyan, Dryden, Swift, Defoe, Addison, Johnson, Burke, Scott, Macaulay (Essays and Biographies).

A minute knowledge of the works of these authors will not be looked for in this part of the Examination, which will, however, test how far the Candidates have studied the chief productions of the greatest English writers *in themselves*, and are acquainted with the leading characteristics of their thought and style, and with the place which each of them occupies in the history of English Literature. Candidates will also be expected to show that they have studied in these authors the history of the English Language in respect of its vocabulary, syntax, and prosody.

The other part of the Examination will relate to one of the periods named below, which will follow each other year by year in the order indicated :—

1.	A.D. 1800 to A.D. 1832.
(1907)	[Nineteenth Century writes to the death of Scott.]
2.	A.D. 1360 to A.D. 1600.
(1908)	[Chaucer to Spenser.]
3.	A.D. 1600 to A.D. 1700.
(1909)	[Shakespeare to Dryden.]
4.	A.D. 1700 to A.D. 1800.
(1910)	[Pope to Cowper.]

The Examination in this part will require from Candidates a more minute acquaintance with the history of the English Language and Literature, as illustrated in the chief works produced in each period, and will be based to a considerable extent, but by no means exclusively, on certain books specified each year by the Commissioners.* The names placed under the dates are intended to suggest the general character of the literary development of the period, and, consequently, the natural limits of the Examination. All the works of Shakespeare, for example, will be regarded as falling within the period 1600 to 1700; all the works of Swift within the period 1700 to 1800; all the works of Scott and Wordsworth, and all the works of Macaulay within the period 1800 to 1832.

* The books for 1907 are :
Wordsworth : Sonnets.
Shelley : Poems.
Campbell : Poems.
Blake : Poems.
"Rejected Addresses."
Hookham Frere : Works.
Peacock : Works.
Lamb : Essays of Elia.
Hazlitt, William (the Elder) : Works.
